Where can a Tippie major take you?

In this section, you'll find breakdowns of different career paths for each Tippie major. These lists are not comprehensive or exhaustive, but they may be helpful for students choosing between majors or trying to pick a direction for their job search.

Each section features explanations of different tracks and concentrations in your major, if they exist, as well as common career paths. We've also included lists of the top employers and job titles for each major, job search keywords, and campus and outside resources. Finally, you can find example resumes for your major at the end of the section.

Accounting

Think of an accounting degree like a Swiss Army knife for business. You've got all these handy skills—managing money, keeping everything in line with rules, and helping make big decisions—that make you a valuable asset wherever you go. And the best part? You could end up working anywhere from government offices to charity organizations or even starting your own [business].”

- Cristi Gleason, professor of accounting

Major Programs and Subprograms

CPA

The CPA program is for students who want to follow a traditional path to a career in public accounting and start earning the hours they'll need to take the CPA exam. See courses and learn more about this program at <https://students.tippie.uiowa.edu/undergraduates/academics/majors-minors/accounting/cpa-course-descriptions>.

Corporate Accounting

The Corporate Accounting subprogram allows students to build a versatile skillset, preparing them for a wide variety of roles in investment banking, financial consulting, corporate accounting, accounting analytics, and more. See courses and learn more about this subprogram at <https://students.tippie.uiowa.edu/undergraduates/academics/majors-minors/accounting/corporate-course-descriptions>.

Career Paths

Private vs. Public

Private accountants work internally for a specific company to review and prepare documents with content that generally stays within the company, like budgets, accounts payable/receivable, or other tracking of money coming into and leaving the firm. Private accountants also prepare and analyze GAAP-based financial statements intended for external users and prepare tax documents. Meanwhile, public accountants usually work for external clients (like individuals, companies, or nonprofits) to review and prepare documents that will be reviewed by the government or released to the public, like tax returns, financial statements, and other important forms. Both private and public accountants have good salaries and steady job availability.

Potential Career Paths

Audit/Assurance

Auditors review financial statements to ensure accuracy, compliance with regulations, and fair presentation. Assurance services go beyond audits to assess processes and risk management. Auditors may work internally within companies or externally at firms that review other organizations' financial activities.

Advisory

Accounting professionals in advisory roles help clients improve business performance, manage risk, and navigate complex financial decisions. This can involve strategy development, restructuring, mergers, or technology implementation. Advisors must stay current on industry trends and regulatory changes to provide valuable insights.

Corporate accounting

Corporate accountants track and analyze companies' financial transactions to create accurate records of income, expenses, assets, and liabilities. By interpreting these records, corporate accountants can provide insights into the company's financial health to key stakeholders and ensure transparency and compliance.

Education

Accounting professionals in education work as instructors or professors, teaching students the principles and practices of accounting. They may also conduct academic research, develop curricula, and advise students. This path often requires advanced degrees and is ideal for those passionate about mentoring and lifelong learning.

Financial accounting

Financial accountants collect and oversee financial data. They may work in forecasting, auditing, or other internal roles. Financial accountants are often tasked with advising company leadership on investments and company outlook based on the data they manage.

Forensic accounting

Forensic accountants investigate financial documents for evidence of crimes, especially financial crimes like fraud and embezzlement. Forensic accountants conduct forensic audits, which examine a subject's finances to determine if evidence of legal wrongdoing exists, and are often called as expert witnesses in trials for people and companies accused of a financial crime.

Government/Nonprofit

Government and nonprofit accountants manage public funds and ensure compliance with regulations and budgets. They may work for local, state, or federal agencies, or within nonprofit organizations, focusing on transparency, fiscal responsibility, and the appropriate use of funds. Their work often supports policy decisions and public trust.

International Accounting

International accountants navigate global financial regulations, currency conversions, and tax laws to support companies operating across borders. They ensure compliance with international standards (like IFRS), manage transfer pricing, and help multinational firms optimize global financial strategies.

Investment Banking/Asset Management

Accounting professionals in investment banking and asset management evaluate financial information to guide investment decisions, manage portfolios, or support mergers and acquisitions. A strong understanding of financial statements and valuation is essential, and the work is often fast-paced and analytically intensive.

IT Auditing/Technology Risk

IT auditors ensure data security, system reliability, and regulatory compliance by assessing risks, identifying vulnerabilities, and evaluating IT controls. Their audits support accurate financial reporting, efficient operations, and improved cybersecurity, helping organizations align technology with business goals while mitigating financial and operational risks.

Legal Services

Accountants working in legal services often support litigation, bankruptcy, or regulatory investigations by analyzing financial data and providing expert opinions. They may work with attorneys on cases involving financial disputes, valuations, or compliance issues, often acting as expert witnesses or consultants.

Management accounting

Management accountants use data to support management decision-making within a company. They may review proposals, issue recommendations, develop financing options, or do other internal tasks.

Tax accounting

Tax accountants specialize in the preparation of tax documents and providing advice to their clients on tax-related topics. They may be extremely busy during tax season (generally January to mid-April and from August to mid-October) but can have great flexibility during the rest of the year.

Public Accounting and the CPA Path

What is a Certified Public Accountant (CPA)?

The CPA is a professional designation that indicates an accounting professional has met the field's highest standards of competence and achievement. This designation can give accountants more flexibility and mobility in their careers; CPAs are sought-after for their reliability, industry knowledge, and credentials.

CPA Eligibility Requirements

To work at most public accounting firms, you must be CPA eligible and eventually obtain your CPA license. Planning ahead of time to ensure eligibility for the CPA in the state where you wish to work will make it easier for you to find a job at a public accounting firm in a timely manner, so make sure to meet with your academic advisor to ensure your class schedule and career plans are aligned if you are hoping to work at a public firm.

Beginning July 1, 2026, the state of Iowa CPA license will require either:

- 120 semester hours of academic work (including required accounting coursework) AND two years of accounting work experience, OR
- 150 semester hours of academic work (including required accounting coursework) AND one year of accounting work experience.

Some states continue to require 150 semester hours regardless of work experience.

To become a licensed CPA, you must pass the CPA Exam. This exam consists of three core sections:

- Auditing and Attestation (AUD)
- Financial Accounting and Reporting (FAR)
- Taxation and Regulation (REG)

You must also pass one discipline section from the following list:

- Business Analysis and Reporting (BAR)
- Information Systems and Controls (ISC)
- Tax Compliance and Planning (TCP)

The CPA exam is taken one section at a time. It is encouraged to take the exams as early as possible; some states, including Iowa, allow you to take the exams while still in school if you meet certain requirements. Studying for and taking the exams is much harder when working full-time, so it's recommended that you use the summer before starting a public accounting job to study and take the exams if possible. Talk to your academic advisor or the Accounting DUS to develop an exam and study schedule that works for you.

Why become a CPA?

Becoming a CPA can provide you with prestige, respect, and career development, as well as financial benefits (aside from higher earning potential, some companies will offer a bonus for passing the CPA exam within a certain period, often 1 or 2 years).

Business Analytics

Are you a person who likes to be more behind the scenes? Are you a person who likes to investigate and really get into the weeds? BA has a role for you. ... Here are reasons why you would come into this major: You tend to be curious, you like to organize information, you want to solve problems. ... People think analytics is hardcore, but it doesn't have to be. If you like the creativity component of being able to make graphs and visuals, this might be the program for you. You can choose how technical or not technical you want your role to be.”

- Kristine Arens, business analytics lecturer

Career Paths

Data & Analytics

Data-focused and analyst roles vary widely across companies and industries, from advisory roles to IT positions; widely common overarching titles range from Data Analyst, Data Scientist, to Data Engineer. Let's break each of these down:

- **Data analysts** can think of themselves as data interpreters. They often work more “behind the scenes” to gather, clean, model & interpret data – communicating results and key findings to leaders or company stakeholders.
- **Data scientists** have strong math and statistics skills; they may do programming tasks, especially developing and training machine learning algorithms. Data scientists may also create graphs and reports to share insights from data. Because of this, having an advanced understanding of analytics and modeling is a must, and many entry-level roles require an advanced degree.
- **Data engineers** often work in an IT or IT-adjacent space. They collect raw data, often through systems they build and maintain, and process it so that it's usable for analysis. An emerging adjacent role is an AI Engineer. An AI Engineer's focus is to build machine learning-powered systems. This includes testing, monitoring, and improving models often using company data. Computer science knowledge for both of these roles is often required.

Business Intelligence (BI)

Business Intelligence Analysts focus on analyzing data to make key business decisions and improve stakeholder value, often analyzing key stakeholder needs, and identifying process improvements. Business analysts often work cross-functionally to identify inefficiencies, presenting findings to business partners – so strong communication and storytelling in this role are key.

Finance & Risk Analysts

- **Financial analysts** evaluate financial performance data, research and market analysis, using financial modeling software and additional tools to present findings and forecast future performance. Analysts can operate across sectors including corporate finance, investment banking, portfolio management, and corporate development.
- **Risk analysts** can span across sectors – including tech, finance, and cybersecurity. Risk analysts focus on identifying and mitigating organizational risk for corporations. This includes detecting risks that could impact stakeholder value and often following strict processes or guidelines – especially in government roles.

Marketing & Consumer Analytics

Marketing research and analytics is a data-centered area of marketing that can involve both quantitative and qualitative research (for example, quantitative research might involve asking potential customers to rate their knowledge or impressions of a product on a Likert scale, while qualitative research could take the form of a short answer survey or a focus group). Data collected in market research is then interpreted to inform decision-making. These analyses help to guide a company's business strategies, optimize brand performance, and enhance the organization's understanding of consumer behavior, market trends, and operational effectiveness.

Supply Chain & Operations

An operations analyst manages and plans key business tasks in an organization. The role often involves coordinating multiple processes and optimizing current and long-term capacity needs, as well as analyzing data to identify opportunities for improvement. Meanwhile, supply chain analysts focus specifically on the organization's interactions with suppliers and customers. Supply chain analysts are often required to have an elevated level of technical proficiency, since they frequently engage in forecasting and inventory optimization.

Consulting

Consultants, whether internal or external, provide specialized expertise to assist with a myriad of business challenges, from organizational change to improvement in performance, all the way to achieving strategic objectives. While consulting roles can encompass many business aspects, a key area of consulting is analytics consulting. Analytics consultants help businesses understand their data to make more informed decisions and create innovative strategies. Data analytics has escalated in demand in the consulting realm, driving a need for skilled data interpreters to translate data into meaningful solutions for clients.

Healthcare

Healthcare analytics is a growing and in-demand field, with many roles combining technical skills with the ability to navigate complex regulations like HIPAA. Data storytelling and translating insights into actionable decisions that improve patient care and operational efficiency are key aspects of the field. Many roles also bridge clinical knowledge with advanced statistical skills to drive measurable improvements in patient outcomes and healthcare operations.

Human Resources (People Analytics)

Analyst roles within Human Resources often focus on using data to improve workforce management and organizational performance. HR Analysts typically focus on collecting, interpreting, and reporting HR data to improve HR processes, support decision-making, and ensure compliance. People Analysts, on the other hand, often take a more strategic approach by using predictive and prescriptive analytics to improve employee experience, engagement, productivity, and workforce planning, ultimately helping organizations make more informed talent decisions.

Government & Public Sectors

The evaluation of data and process improvement is a key focus across government, nonprofit, and other public sector organizations. As these organizations increasingly manage large and complex datasets, data-focused roles are essential for modernizing data management practices, improving operational efficiency, and implementing new data solutions. Communicating key insights to leadership and, in many cases, the public is also an essential responsibility.

Sep YYYY-present

Member/Membership Chair

- Collaborated with chapter leadership and diverse committees to coordinate events, track participation, and support member engagement initiatives
- Utilized Excel and survey tools to analyze chapter feedback and improve programming effectiveness across semesters

Economics

“ The economics major is a context degree. Every decision any business makes should be made taking into account the overall economic environment that it's facing at the time, and that means understanding concepts beyond what the inflation forecasts or the interest rates are at the moment. ... [Economics is] fantastic in terms of giving people context in which to use the more specific skills they've learned in something like marketing or finance. In the end, every business career is primarily affected by the economy.”

- Julia Garlick, associate professor of instruction, economics

Major Programs and Subprograms

The economics major offers three potential degrees: a BBA, a BA, and a BS. Not sure which option is right for you? See the diagram on the next page.

BBA (Economics)

Students in this program apply the tools of economics to a wide variety of industries, including banking, insurance, and retail. It's also great prep for an MBA. See courses and learn more about this program at

<https://students.tippie.uiowa.edu/undergraduates/academics/majors-minors/economics/economics-course-descriptions>

BBA (Analytical Economics)

The analytical subprogram has a more quantitative focus and is great if you're thinking of a graduate degree that involves a lot of number crunching. See courses and learn more about subprogram at

<https://students.tippie.uiowa.edu/undergraduates/academics/majors-minors/economics/analytical-economics-course-descriptions>

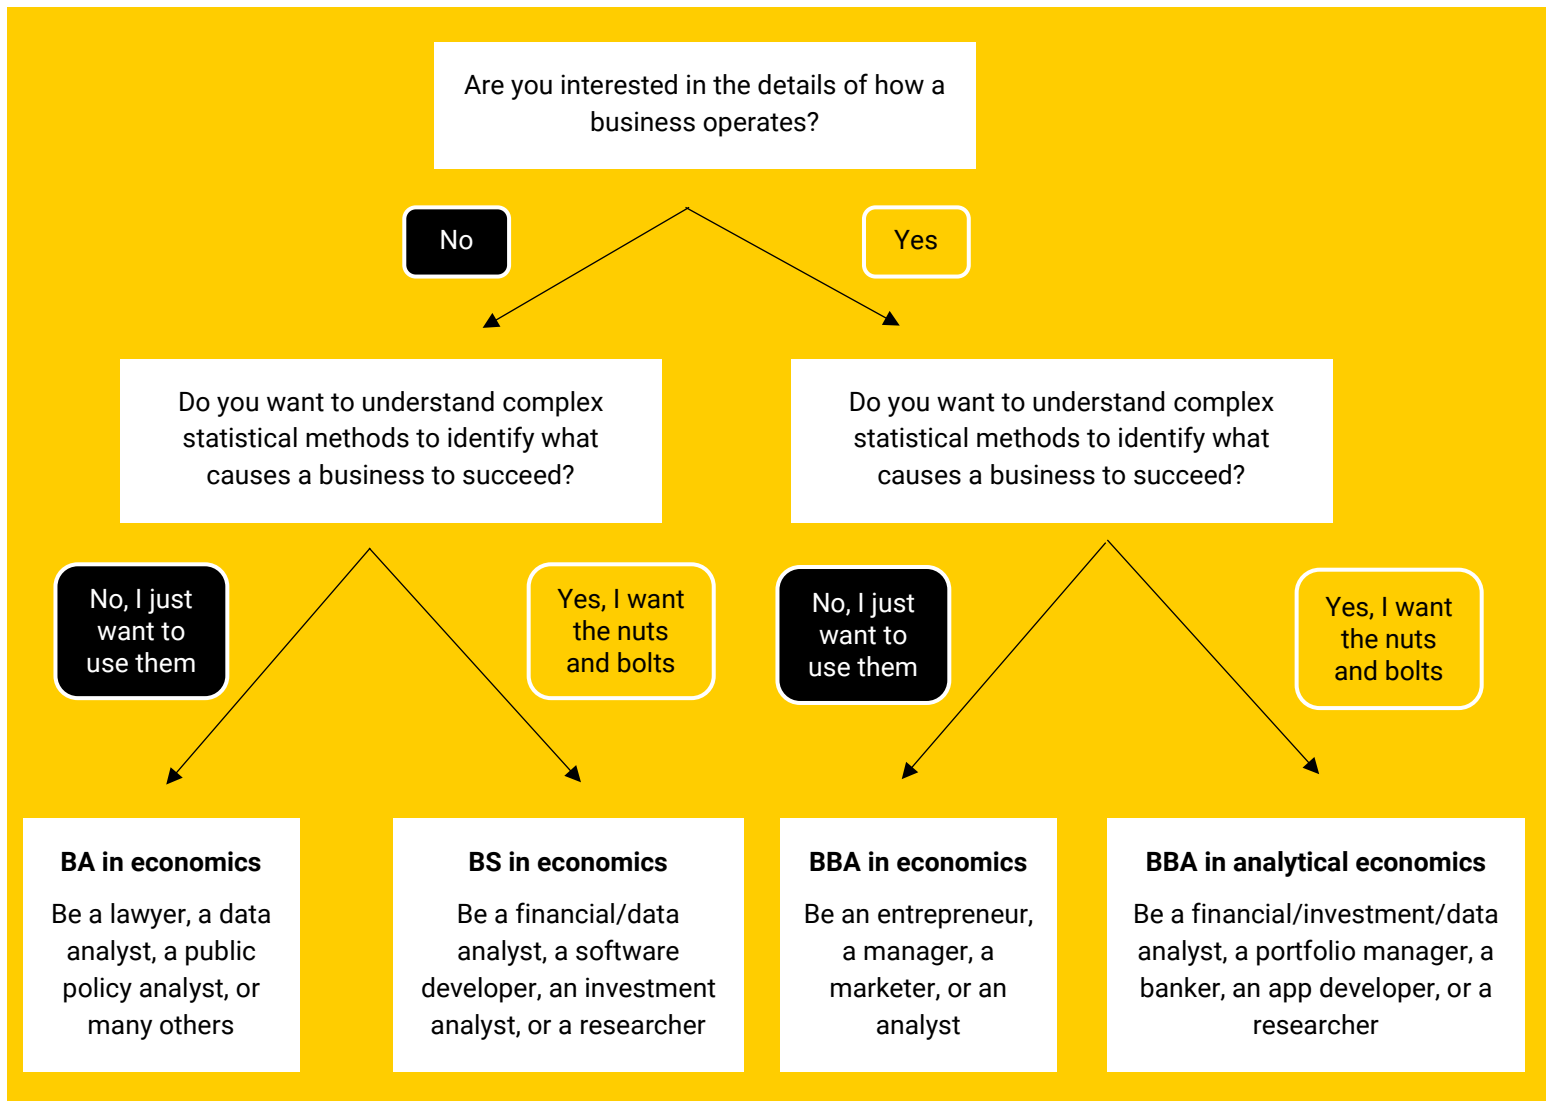

BA (Economics)

The BA gives balanced coverage of theory, mathematical skills, and real-world applications. See courses and learn more about this degree at <https://catalog.registrar.uiowa.edu/tippie-business/economics/economics-ba/#requirementstext>

BS (Economics)

Finally, the BS is similar to the BA in subject matter, but gives a heavier emphasis to analytical skills and tools. See courses and learn more about this degree at <https://catalog.registrar.uiowa.edu/tippie-business/economics/economics-bs/#requirementstext>

Flowchart: Choosing an Economics Degree at Iowa

Career Paths

Career paths for economics majors can be wide-ranging, and where an economics graduate ends up may depend heavily on their unique qualifications and interests. With that being said, the following list contains several areas where economics majors might find their niche:

Academia

For students most interested in economics research and education, the academic field may be a good choice. Economics professors usually specialize in particular areas of interest and publish their work in journals, contributing to the overall evolution of economic thought. An academic background can also be good preparation for employment as an economic researcher for a government, non-profit, or corporate position.

Banking & Financial Services

This includes a variety of banking and money management services, such as savings, investment, and retirement plans. Economics students who work within the financial services industry typically work in commercial banks, mortgage companies, savings and loan establishments, and credit unions.

Business Operations

Business economists often play a key role in shaping business strategies – influencing how companies operate, compete, and grow. Roles often involve analyzing data and economic trends to provide insight, helping businesses understand market dynamics and consumer behavior.

Consulting

Economic consultants use research and analytics to interpret data, model markets, and make predictions. This could also involve understanding economic systems to help support business decision-making, such as analyzing market research and consumer insights to forecast demand using economic models. Economic consultants may work in consulting firms, think tanks, government agencies, and large corporations.

Financial Technology (FinTech)

FinTech is a rapidly evolving sector that merges finance and technology to automate financial services – aiding businesses and consumers in managing financial operations efficiently through software and algorithms. FinTech spans across sectors including retail banking, education, investment management, nonprofits, and cryptocurrency.

Law and Government

Government offices, central banks, and international agencies all hire economists to provide expert guidance, perform research, and produce forecasts on economic topics. An economics degree is also a great background for law school; economic areas of law like bankruptcy, tax law, securities law, and antitrust law all require a strong understanding of economic principles. Roles may be at the federal, state, and municipal level.

Non-profits and Think Tanks

Economists may find positions working at national and international charitable organizations, where they make recommendations and predictions based on data and research. Other nonprofit employment for economics majors can be found at think tanks, which use research (often involving economic topics) to develop policy recommendations and influence the direction of organizations like governments and universities.

Technology and Data Science

As organizations increasingly rely on data to drive decision-making, economics graduates are well positioned for careers in predictive analytics, business intelligence, and supply chain optimization. These roles allow students to apply economic theory, quantitative analysis, and technical skills to identify patterns, forecast outcomes, optimize processes, and support strategic planning across a variety of industries.

Economics I

herky-hawkeye@uiowa.edu

[linkedin.com/in/herky.hawkeye](https://www.linkedin.com/in/herky.hawkeye)

C: 515-987-4321

EDUCATION

The University of Iowa Tippie College of Business

Bachelor of Business Administration, Economics

GPA: 3.6/4.0

Iowa City, IA

Expected May YYYY

Consortium for International Management & Business Analysis (CIMBA)

Cohort Member

Pieve, Italy

Spring YYYY

- Completed coursework in international economics and global business while immersed in a cross-cultural academic setting
- Collaborated with peers from diverse academic backgrounds through team-based projects and leadership workshops grounded in neuroscience and decision-making research
- Gained practical insights into European markets and global economic trends through company site visits, guest lectures, and immersive cultural experiences in Northern Italy

EXPERIENCE

Hy-Vee Market Analysis Project, Principles of Microeconomics

Student Consultant

Midwest Region/IA

Fall YYYY

- Conducted a comparative analysis of pricing strategies among three regional grocery chains, applying supply and demand models and elasticity concepts
- Used Excel and regression analysis to evaluate how consumer behavior responded to changes in price and income levels across product categories
- Presented findings and policy recommendations to classmates and faculty, emphasizing the impact of competitive dynamics on market equilibrium

Kohl's Department Store

Courtesy Team Member

Des Moines, IA

Aug YYYY–present

- Delivered timely and accurate customer service to an average of 75+ customers per shift, resolving product, pricing, and wellness inquiries with professionalism and attention to detail
- Assisted customers with locating and securing 100+ large or high-value items weekly, contributing to a 15% increase in positive customer satisfaction feedback during peak seasons
- Identified and fulfilled special orders and product transfers between locations, improving customer retention and reducing order fulfillment time by 20%

Cashier

May–Aug YYYY

- Processed high-volume transactions efficiently while providing friendly, personalized customer service to enhance shopper experience and build brand loyalty
- Maintained accurate cash drawer, handled returns and exchanges in accordance with store policies, and supported store operations during peak retail hours

TECHNICAL SKILLS

Technical: Excel, Tableau, C++

Economics II

herky-tippie@uiowa.edu

[linkedin.com/in/herky.hawkeye](https://www.linkedin.com/in/herky.hawkeye)

C: 515-987-4321

EDUCATION

The University of Iowa Tippie College of Business, Iowa City, IA
Bachelor of Business Administration, Economics
Minors: International Relations, History

Anticipated December YYYY

TECHNICAL SKILLS

Microsoft Office Suite (Word, PowerPoint, Excel, and Limited Access), HTML Design, Limited C++

EXPERIENCE

Researcher

Wilson Brothers of America LLC, Chicago, IL

Feb YYYY–Present

- Conducted legal and regulatory research, contributing to cost-avoidance strategies that saved the firm over \$20,000 in external legal consultation fees
- Utilized Excel to model loan scenarios and analyze coupon rates and interest payments, leading to financial optimizations exceeding \$100,000 in projected savings
- Supported business expansion by compiling economic and fiscal data to accelerate site selection and permitting for a new location
- Developed internal documentation using HTML and basic C++ scripts to improve data access, automate routine tasks, and streamline decision-making
- Provided client-facing support with a solutions-oriented mindset, ensuring high satisfaction and professionalism in business interactions

LEADERSHIP & ACTIVITIES

Student Athlete, Wrestler

University of Iowa Men's Wrestling

Aug YYYY–Present

- Committed 20+ hours per week to rigorous training, competition, and team meetings while maintaining full-time academic standing and 3.56 GPA
- Engaged in supplemental education including nutrition, strength training, and film analysis to optimize performance and contribute to team strategy
- Represented the University at community events and philanthropy initiatives, building connections with local partners, donors, and alumni
- Participated in media interviews and press engagements, demonstrating professionalism, composure, and clear communication under pressure

Mentor: MoneyThink

Sept YYYY–Present

- Mentored local high school students on personal finance fundamentals, including budgeting, saving, and responsible credit use, to promote financial literacy and decision-making skills

Student Trader: HawkTrade

January YYYY–Present

- Analyzed macroeconomic trends and market movements to contribute to weekly investment discussions and enhance understanding of trading strategies and portfolio management

Entrepreneurship

“ In today’s rapidly changing world, studying entrepreneurship is about learning how to think innovatively, act strategically, and solve real-world problems that create value and impact. Whether you work for a startup, a global corporation, a nonprofit, or launch your own venture, entrepreneurial skills will set you apart. You will be prepared to identify opportunities, lead teams, and drive change—skills every employer values and every industry demands.”

- David K. Hensley, clinical professor of management and entrepreneurship

Career Paths

Career paths for entrepreneurship majors can be wide-ranging, and where graduates end up will depend heavily on their unique qualifications and interests. With that being said, the following list contains several areas where entrepreneurship majors might find their niche:

Startups and small business ownership

Entrepreneurship majors are well-equipped to start their own businesses or work in the startup ecosystem. This path allows them to apply business theory to real-world situations, whether launching a tech company, opening a retail store, or creating a service-oriented venture. Owning a business provides hands-on experience in operations, finance, marketing, and leadership.

Venture capital

Venture capitalists identify promising startups or early-stage companies. Using both their business acumen and instinct for growth potential, they assess business models, markets, and founders to make investment decisions. Many venture capitalists also mentor entrepreneurs, offering valuable insights on scaling, managing risk, and building successful businesses.

Business consulting

Consulting firms may seek entrepreneurial grads to leverage creative problem-solving and strategic thinking to advise companies on how to innovate, restructure, or expand their operations. Business consultants often help clients with new product development, market entry strategies, and operational efficiency, offering tailored advice that helps businesses grow or pivot successfully.

Corporate innovation/entrepreneurship teams

Large corporations often establish innovation or "intrapreneurship" teams to drive growth through new products, services, or business models. They may work on launching new divisions, testing new markets, or driving disruptive innovations within established organizations, combining entrepreneurial creativity with the resources of a larger enterprise.

Marketing and product management

The marketing world requires skill in innovation, market research, and customer experience. Students pursuing this career path will need to understand consumer needs and how to craft products or services that solve them. These roles allow them to lead cross-functional teams, from development to marketing and sales, ensuring that products or services resonate with target audiences.

Non-profit and social enterprises

For students with a passion for social change, working with non-profits or social enterprises can be highly fulfilling. These organizations often require entrepreneurial thinking to create sustainable business models that drive their social missions forward. Entrepreneurs can apply their knowledge of business strategy to ensure that these organizations are financially viable while achieving their social or environmental goals.

Corporate strategy and business development

Entrepreneurship majors with strong analytical and leadership skills may find themselves in corporate strategy or business development roles, helping large organizations expand market reach, negotiate partnerships, and identify opportunities for growth. In this field, students work to spot emerging trends, assess risks, and lead change within established businesses, helping companies remain competitive in a rapidly evolving landscape.

Finance

Finance is money. All decisions and plans - from personal investing and retirement, to corporate investment and financing, to risk management and protection - have finance at their core. ... Some finance careers have extremely lucrative paths, while all corporations rely on finance to help them survive - either through capital-raising or through good decision-making on which ideas to pursue. At the end of the day, finance adds value.”

- Jon Garfinkel, professor of finance

Career Paths

Corporate Finance

Corporate finance professionals manage the company's internal financial operations. Roles may involve work in business development/strategy, financial planning/analysis, investor relations (a PR background is a plus for this), auditing/accounting, treasury roles, and commercial finance. Your work will shape how the company manages its funds, allocates resources, and plans for the future.

- **Functions:** Financial Planning & Analysis, Treasury, Controllers

Corporate Development

Corporate development roles focus on external growth opportunities – including strategic decisions to grow, restructure, and strengthen the business. Professionals work closely with investment bankers to expand the company's platform or capabilities. Some corporate development roles require previous experience in the industry, so ensure you read job descriptions carefully.

- **Key transactions:** M & A (Mergers and Acquisitions), Divestitures (leading sales of business units/divisions), Strategic Partnerships, and Investments

Finance Specializations

Asset and Wealth Management

Asset and Wealth Management roles are focused on helping individuals and institutions build, protect, and optimize their wealth through strategic investment planning. This may include working with high-net-worth individuals or large organizations. Many roles have a strong emphasis on client relationships, and successful advisors must be able to build trust and deliver consistently strong service.

- Common roles: Asset Manager, Portfolio Manager, Investment Advisor, Financial Advisor, Wealth Manager/Associate, Private Wealth Advisor

Banking

As a banking professional, you may work with businesses, governments, or individuals to provide financial services, manage risk, and offer strategic advice. Banking offers opportunities in various sectors, including corporate, retail, and investment banking.

- **Investment Banking Specialization:** Investment bankers underwrite debt and equity securities for corporations, as well as creating purchase and sale deals and structuring their financing. Investment banking firms require tremendously long hours of new associates, and the interview process is intense and competitive. Because of this, even entry-level positions are well-compensated, and a background in investment banking offers many ways to off-ramp to a lower-commitment job. To go into investment

banking, high grades are key (usually 3.5+ GPA), and you'll need to spend significant amounts of time on interview prep.

- Additional banking roles may include Banking Analyst, Branch Manager, Financial Advisor, Commercial Loan Officer, Risk Manager, Sales Trader, Equity Research Analyst, Compliance Officer, Credit Analyst, and Treasury Analyst

Commercial Real Estate (CRE)

Commercial real estate is a sub-specialization within finance that encompasses a wide range of career opportunities involving financing, investment analysis, valuation, risk management, and capital markets execution. From development to property management to portfolio management and acquisitions, CRE blends real estate expertise with finance skills – offering high earnings and diverse roles.

- Common roles: Financial Analyst, Asset or Portfolio Manager, Underwriter, Loan Officer, Investment Manager, and Developer

ESG Investing (Environmental, Social, and Governance)

A socially responsible investment sector that focuses on sustainability and ethical business practices. Roles within ESG focus on managing ESG investment portfolios – prioritizing ethical and socially responsible finance.

Financial Planning and Analysis (FP&A)

FP&A Analysts are storytellers who use data to shape business strategy, assisting businesses with making data-driven decisions by providing forecasts, budgets, and financial insights.

- Common roles: FP&A Analyst, Regulatory and Compliance FP&A Analyst

Financial Technology (FinTech)

FinTech is a rapidly evolving sector that merges finance and technology to automate financial services – aiding businesses and consumers in managing financial operations efficiently through software and algorithms. FinTech spans across sectors including retail banking, education, investment management, nonprofits, and cryptocurrency.

Management

“ I think all majors have more [career] opportunities than students probably think, but it's especially true in management. If you're passionate about people, leadership, and teams, management will give you skills that are needed in virtually every organization. So you're really going to have a lot of options. You're learning things that will be applicable to almost any potential career.

- Jason Glass, lecturer, management

Major Programs and Subprograms

Entrepreneurial Management

Students in this program will learn the skills necessary for financing, developing, and marketing new products and businesses. See courses and learn more about this program at

<https://students.tippie.uiowa.edu/undergraduates/academics/majors-minors/management/course-descriptions#Entrepreneurial-Management-track>

Human Resources

This subprogram prepares students to recruit, develop, and train a business's greatest asset: its people. See courses and learn more about this subprogram at

<https://students.tippie.uiowa.edu/undergraduates/academics/majors-minors/management/course-descriptions#Human-Resource-Management-track>

Leadership

The leadership subprogram is appropriate for students who want to get ready to be the go-to person in their career, whether they're running a project, a team, or an office. See courses and learn more about this subprogram at

<https://students.tippie.uiowa.edu/undergraduates/academics/majors-minors/management/course-descriptions#Leadership-and-Management-track>

Career Paths

Business and Operations

Roles in business and operations management focus on planning, coordinating, and improving an organization's day-to-day operations. Professionals may develop business strategies, oversee production and supply chain processes, ensure quality standards are met, and identify opportunities to improve efficiency. Many mid- to upper-level management roles also involve supervising employees and leading teams.

Professional Sales and Client Services

Professional Sales and Client Services roles are similar, with a few key differences. Sales roles focus on acquiring new business and meeting revenue targets, while Client Services roles focus on maintaining existing relationships and ensuring client satisfaction. Depending on the organization's structure and business needs, sales roles may involve outside sales, inside sales, or a combination of both. Outside sales require traveling to meet clients, attend meetings, trade shows, and networking events, while inside sales involve selling products or services remotely by phone, email, or other digital channels.

Project Coordinator/Manager

Project coordinators or managers are tasked with managing all phases of a project, from inception to completion. Responsibilities often include overseeing multiple projects at a time. The ability to clearly articulate project requirements and manage the timely completion of each aspect of each project is essential.

Office Administration and Support

Office administrators oversee the logistics of running an office. They may manage payroll, supply orders, budgets, maintenance, and executive appointments. They play an important role in business operations and should be knowledgeable and up to date on company policy and procedures.

Human Resource Generalists

HR generalists work in all aspects of human resources, including payroll, recruiting, hiring, onboarding, benefits, training, and other aspects of employee management. They get excellent experience with multitasking and generally have versatile skills that can be applied in many environments.

Human Resource Specialists

HR specialists are experts in a specific area of human resources. They generally work as part of a larger HR team, where they focus on one specific HR need, such as benefits administration. HR specialists are more likely to be found at larger companies with bigger HR departments, and their roles are often more strictly defined than generalist roles.

Talent Acquisition and Recruitment

Recruiters or talent acquisition roles will vary from organization to organization, depending on size, business strategy, and needs. Both may focus on full-cycle recruitment – aligning with hiring managers, sourcing candidates, interviewing, offer management, and assisting with onboarding.

Marketing

“Marketing is everything, as everything communicates. As a marketing student, you’ll learn to understand what people need, how they think, and how to reach them in meaningful ways. Whether you’re building brands, launching advertising campaigns, analyzing consumer behavior, or driving sales, marketing equips you with the creative and strategic tools to connect ideas with audiences. These skills prepare you to thrive in any industry.”

- Rob Rouwenhorst, associate professor of instruction, marketing

Major Concentrations

Unlike the subprograms offered in some other Tippie majors, where students can choose a particular path to guide their coursework, the marketing major has five optional concentrations that come with two required courses each. These concentrations are marketing communication & strategy, marketing research & analytics, product & brand management, professional sales management, and retailing & e-commerce. To learn more about these concentrations and view required courses, visit <https://tippie.uiowa.edu/undergraduate/majors/marketing-major>.

Career Paths

Communication & strategy

Marketing communicators and strategists develop and execute clear, consistent messaging and conduct strategic planning to achieve business goals. This planning may involve identifying target audiences, crafting tailored communication strategies, and leveraging multiple platforms to strengthen brand awareness & reputation.

Research & analytics

Marketing research and analytics is a data-centered area of marketing that can involve both quantitative and qualitative research (for example, quantitative research might involve asking potential customers to rate their knowledge or impressions of a product on a Likert scale, while qualitative research could take the form of a short-answer survey or a focus group). Data collected in market research is then interpreted to inform decision-making. These analyses help to guide a company’s business strategies, optimize brand performance, and enhance the organization’s understanding of consumer behavior, market trends, and operational effectiveness.

Product and brand management

Product and brand managers develop, position, and manage products and brands throughout their lifecycles. In this role, common responsibilities may include market research, product development, and brand strategy. Ensuring products align with customer needs is a core goal of product managers as they work to drive brand equity and business growth.

Professional sales management

Professional sales management entails overseeing a sales team, setting targets, and implementing strategies to drive revenue growth. These kinds of managers train and evaluate the performance of salespeople to ensure their team's work aligns with business objectives while improving and maintaining customer relationships and maximizing sales opportunities.

Retail & e-commerce

People working in retail and e-commerce manage and optimize physical and online sales channels. They may manage inventory management, improve customer experience, develop pricing strategies, and create or curate content for digital and physical marketing. Retail marketers work to increase product availability, reach, and revenue across consumer touchpoints.

Risk Management & Insurance

"Risk management and insurance is one of the largest global industries, vital for every business. With 50% of the workforce retiring in the next five years, there is an urgent need for new talent, creating a golden opportunity for future leaders to make an impact using proven methods and innovations like AI and insurtech. This is a prime opportunity to make a return on your educational investment while helping make the world safer, smarter, and more secure."

- Jim Lewis, executive director of the Vaughan Institute

Risk Management and Insurance (often abbreviated RMI), previously a certificate at Tippie, was added as a major in 2023. Risk management is a field that involves identifying, assessing, analyzing, and mitigating risks to protect individuals and organizations from financial loss, legal consequences, and other adverse repercussions. Risk management and insurance professionals have many skill crossovers with people who work in finance and business analytics, with a specific focus on risk assessment and management, as well as sales and marketing.

Types of Insurance Companies

Brokerage/Agency

Insurance brokerages/agencies act as an intermediary between clients (individuals, businesses, or organizations) and insurance companies to find the best insurance products to meet client needs while ensuring the coverage is both comprehensive and cost-effective.

Carrier

Insurance carriers are companies or providers that underwrite and issue insurance policies assuming the financial risk associated with the policies. Insurance carriers sell coverage, handle claims, and manage the financial risk of the policies they offer.

Regulator

Insurance regulators are government agencies or authorities responsible for overseeing the insurance industry to ensure it operates fairly, transparently, and in compliance with laws and regulations. The primary goal of an insurance regulator is to protect consumers, maintain the stability of the market, and ensure that companies remain financially able to meet their obligations to policyholders.

Reinsurance

Reinsurance can be thought of as "insurance for insurers." When an insurance company faces large risks, like major natural disasters or large-scale claims, it can transfer some of that risk to a reinsurance company. This helps the original insurer maintain financial stability, spread its risk, and increase its capacity to take on more policies.

Captive

Insurance captives are a type of insurance company that is wholly owned by the organization it insures. It functions as a subsidiary established by a parent company to provide coverage for the risks faced by the parent company.

Career Paths

Account management

Account managers are responsible for maintaining and managing client relationships, ensuring insurance policies are properly serviced, and helping clients navigate their insurance needs. Account managers must have strong customer service and relationship management skills, and give focus on client retention, cross-selling products, and ensuring clients have appropriate coverage.

Claim adjustment

Claims adjusters investigate insurance claims to determine what, if any, compensation the claimant will receive. They may inspect property damage, consult with field-specific experts like mechanics or doctors, and manage communication with the claimant.

Insurance brokerage

Insurance brokers match insurance products (i.e. life, health, auto, property, business) to individuals, businesses, or other entities' needs. Agents and brokers identify clients' insurance needs, offer tailored coverage solutions, and build relationships that help facilitate client retention.

Loss prevention

Loss prevention managers (also called asset protection managers) analyze the risk of loss (such as theft or damage) for a client or employer. They determine risk based on situational and statistical factors, then issue recommendations for policies and procedures to prevent future loss.

Risk analysis

Risk analysts track a company's investments to make forecasts about future risk and issue recommendations to reduce liability. A double-major with finance and RMI would prepare you well for this role, as understanding investment management and determining risk go hand-in-hand.

Enterprise risk management

Enterprise risk managers are responsible for identifying, assessing, and managing the risks that could potentially impact an organization's operations, reputation, financial stability, or overall strategic goals. The role focuses on managing risks across all departments or functions of an enterprise, rather than focusing on individual business units or specific types of risk.

Underwriting

Similar to actuaries but less math-focused, underwriters determine individual clients' eligibility or pricing for loans and insurance policies. Underwriters will often apply actuarial formulas to a specific client's situation to determine their eligibility. However, underwriters generally don't have direct customer contact; they mainly work behind the scenes to assess if a customer is a good fit for a given product.

Marketing

In the insurance industry, marketing specialists focus on developing and implementing strategies to promote insurance products, build brand awareness, and retain clients. Their role is crucial in driving customer acquisition, engagement, and long-term relationships, while also ensuring that the brand is positioned effectively in a competitive market.

- Facilitated weekly financial literacy lessons for local high school students, covering budgeting, saving, and responsible credit use to promote smart money habits

The Job Search

General Guide to Recruitment Timelines & Job Search Strategy

(See the next page for a visual guide to timelines in common industries for Tippie students)

Tips for Your Search

- Start early and prepare as much as possible in advance
- A typical job search takes 3–6 months; stay patient and persistent
- Treat your job search like a full-time job and set aside dedicated time for it
- Focus on when applications open, not just the deadline—most employers review candidates on a rolling basis

Key Terms to Know

Leadership Development Program (LDPs): Structured, often rotational programs designed to develop early-career talent into future organizational leaders. Most LDPs recruit well in advance, typically during the fall for the following summer. These programs often follow traditional campus recruiting timelines and may include multiple application deadlines.

Structured Hiring: Proactive, planned approach to recruit anticipated roles with a standardized process and recruitment timeline. Employers typically know their hiring needs well in advance.

Just-in-Time Hiring: Reactive approach to fill roles quickly in response to immediate hiring needs, often with compressed and less structured recruitment timelines. Hiring and recruitment typically happens closer to the internship or job's start date.

Special Industry Notes

Accounting & Investment Banking: These industries, especially at major firms, are known for early internship recruitment. Applications often open 12–18 months in advance and are reviewed on a rolling basis. Full-time opportunities are limited, as most roles are filled through return offers extended to previous interns.

Professional Sales: While not a specific industry, professional sales is a common job function found across industries, and opportunities are typically posted and filled on a rolling basis.

About This Guide

The recruitment timelines shown on the following page were developed using data from multiple public and private institutions, along with insights from leading recruiting platforms. They reflect common application, interview, and offer patterns for both internships and full-time roles across industries typically pursued by undergraduate business students. The list of industries shown in this guide was curated using Handshake categories, Tippie's academic majors, and career outcomes reported by undergraduate business students. The selected industries reflect common career paths for Tippie grads and fields aligned with Tippie students' interests and academic backgrounds, as well as employment trends.

Disclaimer: The timeline on the following page is intended as a general guide. Exceptions may occur and can vary depending on company and industry.

Application Pipeline & Hiring Types

Structured Vs. Just-In-Time Hiring

Just-in-time hiring

When a position is created or vacated, companies use just-in-time hiring to fill it. The period for this type of hiring is short, with positions often filled 2-3 months after the original posting. Additionally, while networking is important to any job search, building relationships is especially critical to success when applying for a just-in-time position, as internal referral is common. Just-in-time hiring occurs in every industry, just by nature of its function, but you can expect to find it especially frequently in small companies and new or growing organizations.

Structured hiring

Some companies utilize strict structured hiring systems and timelines when looking for talent, posting positions a full year (or sometimes even longer) before the anticipated start date. In structured hiring cases, companies are generally filling more than one position at a time. Candidates progress through a standardized interview process and are often brought in as a cohort. Companies may also send recruiters to campus to build their brand and generate interest in the position. The funnel is larger, and the company is filling more than one position. Structured hiring is most common in larger, more established firms that have a yearly need for new talent.

Leadership Development Programs

Also commonly referred to as rotational programs or management associate programs, leadership development programs (LDPs) occupy a percentage of the overall structured hiring environment. LDPs require that students get hired into a specific function (such as finance, marketing, and/or operations/supply chain), but candidates will then rotate across different functional areas of the business. This approach enables candidates to gain broad perspective of the functions within a large organization, how they intersect, and the impact each area has individually and collectively on the business and its consumers.

Timing

LDPs vary in length, but on average, they tend to be structured as one or two-year programs with a set number of rotations within that timeframe (rotations generally last between 6 months to 1 year]. Some programs will rotate you across functions within one office (typically company headquarters), while others require geographic mobility with rotations across the US. Some LDPs also include international rotations.

Placement

The intent for LDP employees, following the successful completion of program rotations, is placement at manager level or higher within a functional unit. Spots are not guaranteed, however, and the placement process can be rigorous, requiring candidates to interview with units where openings exist.

Employment Types

Full-time: Also known as full-time employment (FTE) or a permanent fixed-term offer, these positions require that the employee works a minimum number of hours (32-40 hours/weekly) defined as such by their employer. Full-time employment often comes with benefits that are not typically offered to part-time or temporary employees. These positions can be both hourly and salaried.

Part-time: In part-time positions, employees work fewer hours than what is considered full-time, typically less than 32 hours per week. These roles offer flexibility in scheduling and are common in retail, hospitality, and education. Part-time employees are usually paid hourly and may not receive the same benefits (health insurance, paid leave, etc.) as full-time workers, although this can vary by employer and location.

Internship: an offer presented to job candidates, often students, who are interested in gaining work experience in specific industries. These are most often completed during the summer months.

Contract: Usually for a specific number of months or years, contract offers outline that the employee is paid through the company payroll and eligible for benefits such as sick leave and medical leave.

Temporary: These short-term offers outline that the employee is paid hourly through a recruiter or recruiting firm and is not eligible for any company sick pay or benefits. These opportunities can be terminated with little to no notice.

Co-op: Co-ops are structured as a balance of education and work. They are sometimes eligible for credit, though it depends on the school. Co-op opportunities will usually have a set end date, after which you may receive a longer-term offer.

Externship: Externships are short experiential learning programs in which students or other interested parties will shadow a professional at their job to get a sense for their responsibilities and daily schedule. These opportunities tend to be very short-term, some as short as a few days. They are generally unpaid.

Supporting your mental health in the job search

Just like academics, finding a job can be stressful and emotional at times. Tippie Thrive is a peer-based wellness program that embeds mental health, mindfulness, wellness, resilience and professional development into the Tippie experience to support both person well-being and career readiness. The program delivers classroom-based programming, workshops, conversation and skill-building opportunities. In addition, Tippie Thrive offers students a chance to earn the Thrive and Resiliency Badge to recognize those taking steps to enhancing their lifelong personal growth and development skills. The badge focuses on the skills of adaptability, initiative, stress management, confidence, emotional intelligence, and communicating needs. Earning the badge involves fulfilling four commitments, which include multi-sessions, workshops, peer support training, and a reflection, for a total time commitment of 10-12 hours. Learn more about Tippie Thrive at <https://students.tippie.uiowa.edu/undergraduates/emotional-and-mental-health/tippie-thrive>, and if you're interested in pursuing the Thrive & Resiliency badge, sign up for the program's ICON site at https://uiowa.qualtrics.com/jfe/form/SV_01ahlmWGP69eggK.

Networking

Think of networking as simply connecting with people — having a conversation, asking questions, learning from others, or offering your insight in return. You do this every day without realizing it. Whether it's asking a friend for a doctor recommendation, texting a classmate about which professor's section to take, or liking someone's LinkedIn post about their internship, you're already doing it. The key is being intentional.

Finding Ways to Connect

Networking doesn't have to occur at a career fair or a packed event. In fact, the most valuable connections are often one-on-one conversations.

If you enjoy...	Try...
Casual conversations	→ Reaching out for a 15-minute coffee or Zoom chat
Learning from stories	→ Attending a small panel and asking a question
Observing and reflecting	→ Follow people in your field on LinkedIn and interact with posts
Jumping in	→ Volunteering at an event or joining student org

Mutually Beneficial Networking

A great connection isn't about asking for a job. It's about sharing advice and support, exchanging stories and anecdotes, as well as learning from someone else's experience, path, and perspective and helping them understand yours. When you make a good impression or learn something helpful, that's a win for both of you. Professionals often want to give back, and your curiosity can help them reflect on their own path.

People are busy, but most are willing to help especially when you make it easy for them to say yes. A simple framework to follow is: Who you are + Why you're reaching out + What you're asking for + Specifics or timing (if applicable)

Example 1: Career Fair Follow-Up

Hi [Name], it was great meeting you at the Tippie Career Fair today—thank you for taking the time to talk with me about opportunities at [Company]. I enjoyed learning more about [specific detail they shared, e.g., “your internship program structure” or “the collaborative culture on your team”], and it confirmed my interest in applying.

If you're open to it, I'd love to stay connected and learn more about your experience at [Company]. Would it be okay if I followed up with a few questions via email or connected here on LinkedIn?

Example 2: Alumni Connection on LinkedIn

Hi [Name], I came across your profile through the Tippie network. I'm exploring marketing roles in healthcare and your career path stood out to me. If you're open to it, I'd appreciate a chance to hear about your work and any advice you have for someone just getting started.

Example 3: Follow-up from Event or Class Visit

Hi [Name], thank you for visiting our business class this week! I really appreciated your insight on managing client relationships. I'd love to follow up with a quick question or two, would it be okay to email you or connect on LinkedIn?

Tips to Keep in Mind

- Be authentic: You don't need to impress, just be curious and respectful.
- Follow up: A thank-you note, even via email or LinkedIn, goes a long way.
- Give back: Even as a student, you may have insight on campus orgs, majors, or internships that could help others.
- Ask for advice or insight, not 'help.' Do not assume that a cold contact, or even one where you have a mutual contact in common, will want to drop what they are doing to help, especially if the 'ask' is for a job or referral. Relationship-building is critical. Think in terms of seeking advice and building trust.
- If you have questions that can alert your reader to what you are interested in learning, you may find that potential contacts are more open to meeting. How might their career path influence your career choice? Perhaps you want to pivot to a different industry. What market trends will be important in the next two years? Could they share any advice on courses or experiences you should seek out while you are finishing your degree?
- Close with an 'ask' that is respectful of their time. Some will acknowledge they are busy, or it may be a challenging time to schedule due to deadlines or travel. Stay flexible and appreciative. Use virtual meetings to your advantage. Twenty to thirty minutes is a common ask.

Tools to Help You Connect

- LinkedIn: Search Tippie alumni and filter by industry, company, or location.
- Handshake: Check for events, panels, and employer visits.
- Tippie Student Organizations: Peer to Peer and professionals and faculty in niche areas.
- Tippie Career Services: We'll help you craft your outreach, prep for a chat, or find people to connect with

It is **critical** to adapt any version of a communication template to your own POV while keeping it professional. If you have a mutual connection or were referred by someone else, include that name (with their permission) in your email; this can turn a cold lead into a warmer one. **After you sign your name, include email, phone and your LinkedIn profile. Do not attach a resume at this initial stage.**

Maintaining Connections

The networking process takes time, so do not expect immediate results, and in general, do not expect anything in return outside of the time and insight your connections are willing to provide. A core tenet of a good networker is the mindset that they give more than they will get. Stay in touch with the individuals in your network on a regular basis; it doesn't have to be daily or even weekly to be effective, but it does have to be relevant. If you come across an article that may be of interest to a connection, pass it along with a brief note. Keep an open mind and remember that everyone you meet, regardless of the situation, has the potential to become part of your network if you allow them to.

Other Places to Network

While professional communication is a critical part of creating and maintaining your network, there are plenty of in-person opportunities to build valuable professional connections too. These may include:

Events & Activities

Tippie and the university at large offer plenty of ways to “get out there;” professional organizations and associations, volunteering, social events, receptions, and mixers can all be great networking opportunities, to name a few. When preparing for one of these events, focus on two things:

1. Get informed about what’s happening in business and industry/employers of interest. You want to be prepared to speak about these topics if asked.
2. Know what you want from your next job and what you have to offer—this is your pitch. When you’re mingling at a Chamber of Commerce open house and someone asks who you work for, you can give a specific answer that shows your professional interests, like *“I currently work in outside sales for manufacturing company, but I am looking to move into a marketing role in order to build on my finance and analytic skills.”*

Career Fairs

Participating and attending a career fair is a great way to learn more about specific (hiring) companies, discover opportunities, and get valuable face-to-face time with hiring managers and recruiters. Iowa career fair attendee lists are often available in advance on Handshake or via the sponsoring office, so review the list of employers ahead of time and identify companies you are interested in speaking with.

Tippie Faculty & Staff

Connect and update instructors and program staff of your current situation and your career goals. They are constantly building relationships with employers, organizations, and leaders within and beyond the borders of your community, so keep them informed of your interests!

Assessing and Communicating Your Personal Brand

Defining words

What 3 or 4 adjectives best describe the value you offer? What words do you use to define your personality? Some examples are listed below.

Collaborative	Diplomatic	Intentional	Adaptable	Resilient	Intuitive
Ethical	Precise	Enterprising	Assessable	Risk-taking	Visionary

Core strengths

In what functions and responsibilities do you excel?

When are you considered the “point of reference” – which qualities are included?

Identifies Problems	Motivates	Communicates	Leverages	Offers
Mentors	Designs	Anticipates Risk	Leads	Innovates
Builds Consensus	Coaches	Delegates	Listens	Implements
Manages Conflict	Facilitates	Presents	Writes	Analyzes

Self-Promotion

Once you establish your unique brand proposition, the only way to make it relevant to the marketplace is by promoting it. Communication of your brand can occur in multiple channels. It is important to be aware that your brand is being communicated every day, including in ways that may be unintentional—such as your content on social media or an email or phone communication to a Tippie alum.

Resume

Resumes are the most obvious communicator of your brand, but only impactful if you know your audience and make yourself relevant to their needs. Targeted resumes are necessary if you intend to pursue opportunities across more than one function or industry. This requires you to make modifications to your primary version to highlight the skills/experiences that are in closest alignment with the position to which you are applying. Do not attempt to make a “one size fits all” version, as this can cause your brand to be perceived as unfocused.

Pitch

A pitch is a summary of your background and experience. It allows you to introduce yourself quickly, make a memorable impression, and demonstrate your value, especially if you are job searching. Practicing your pitch, and even writing it down, can help you start up conversations more smoothly and efficiently.

Demeanor & Participation at Networking Events

Remember, every touch point is another opportunity to communicate your brand. It is up to you to determine whether this activity will have a positive or negative impact.

Communicating Your Brand on Social Media

Your online presence is another piece of your brand. As social networking grows increasingly pervasive, more employers are utilizing these sites to screen potential employees.

Informational Interviewing and Job Shadowing

Informational interviews and job shadowing can offer valuable insights to guide your career decisions and personal growth. They help you explore roles, build connections, and gain clarity, whether that means confirming your interests or realizing a path may not be the right fit. Learn more about each experience below.

INFORMATIONAL INTERVIEWING

An informational interview is a focused conversation with a professional aimed at gaining valuable insights into a specific role, company, industry, or career path you're interested in exploring. Meetings typically last 15 – 30 minutes. However, if you have a strong connection, they can extend up to an hour.

JOB SHADOWING

Job shadowing is an unpaid opportunity to observe a professional in their daily work environment, offering firsthand insight into their tasks, workplace culture, and the skills required for the role. The duration can vary based on availability and the nature of the position, ranging from a single hour to several days.

How to Begin

1. Determine what you want to know

Before reaching out for an informational interview or job shadowing opportunity, it's essential to first identify what you hope to learn. Are you curious about someone's career path? Interested in a specific company, role, or industry? Exploring whether a graduate degree is the right next step?

Clearly defining your goal will help you identify the right people to contact and lead to more focused, meaningful conversations.

2. Determine your 'who'

Once you've clarified what you'd like to learn or discuss, the next step is identifying someone who can help. Start by exploring your existing network. Do you already know someone who has experience in the role, industry, or company you're interested in? If not, begin researching professionals who align with your career goals.

Tap into your Tippie network first. Consider Tippie alumni, faculty members and their connections, guest speakers from your classes, Tippie staff, or mutual contacts. Reaching out through a "warm" connection—someone you share a link with—is often more effective and comfortable than a cold outreach.

3. Reach out

Once you've identified the right person to contact, reach out via email, LinkedIn, or phone (if they're already part of your network). Be thoughtful and respectful in your request, keeping in mind that professionals often have demanding schedules. Some may be navigating busy periods due to deadlines or travel, so it's important to remain flexible, patient, and appreciative of their time. Virtual meetings can also be a convenient option for both parties – don't hesitate to suggest them. If you were referred by someone or share a mutual connection, consider asking for an introduction or mentioning that person in your message (with their permission). If you're reaching out without a shared connection, craft a polite, concise message that clearly states your purpose. Tailor your communication to

the audience – consider how well they know you, what context they'll need, and which details may not be relevant. The key is to be clear, courteous, and purposeful.

4. Setting the right tone

Whether you're reaching out to a cold contact or through a mutual connection, it's important not to assume that someone will immediately be available to assist you. Relationship building takes time, and thoughtful communication is key. Networking is about learning, not asking for a job. Be respectful and clear. Ask for insight or advice – not help. Approach each interaction with professionalism, and you'll lay the foundation for strong, lasting connections.

Here are sample messages for informational interviewing (gold) and job shadowing (gray):

Hello [their name],

I hope you're doing well. My name is [insert your first and last name] and I am a current junior majoring in finance at the Tippie College of Business. I am very interested in pursuing a career in investment banking and would like to learn more about the field. Would it be possible to schedule 15-30 minutes with you at your convenience to ask a few questions and get your advice on how to best prepare to enter this field? I am available for a phone conversation, Zoom call, or visit to your office.

I realize that you are busy, and your time is valuable. I appreciate your consideration of this request. I can be reached at [academic email address] or 319-xxx-xxx.

Sincerely,

[your name]

Hello [their name],

I hope you're doing well. My name is [insert your first and last name] and I am a current junior majoring in finance at the Tippie College of Business. I am very interested in pursuing a career in investment banking and would like to learn more about the field. If you are willing and your office allows students to shadow, I would welcome an opportunity to observe your work and learn about the culture and environment at XYZ company whether in person, or over Zoom. My class schedule allows me to spend a couple hours on Monday, Tuesday, or Friday mornings off campus, and I would be able to work around your work schedule.

I realize that you are busy, and your time is valuable. I appreciate your consideration of this request. I can be reached at [academic email address] or 319-xxx-xxx.

Sincerely,

[your name]

5. Preparing for the session

Search for details about the individual you will interview/shadow using the company website and their LinkedIn profile. Research their organization using their website, and social media accounts (see our company research worksheet on page 100 of this guide). Also review any recent publications or articles about the company specifically and the industry overall.

For informational interviews, prepare questions. The person you're speaking to will expect you to lead the conversation, as you requested the meeting with them. Here are some example questions:

- Why did this career path interest you, and how did you get started?
- Aside from schooling, how did you prepare for this job?
- What do you wish you knew about this industry/position before you started?
- What specific technical and soft skills are most essential to be effective in your job?
- Has your experience in this career field differed very much from what you imagined it would be? How?

For job shadows, practice proper workplace etiquette. Be prepared and ready to learn and carefully listen/observe the culture of the workplace and the people.

- Shake hands and introduce yourself with everyone you meet
- Ask for business cards OR connect on LinkedIn with each employee you meet with
- Select appropriate dress as you would for a formal interview if the informational interview or shadow is in person
- Bring a notepad or padfolio for notetaking as well as your current resume OR be prepared to share information on you and your background
- Confirm the location or meeting time the day prior, review directions beforehand and plan to arrive 5 to 10 minutes early

6. Closing the session and following up

Much like a formal interview, make sure you follow up within 24 hours or the next business day thanking the person you met with for their time, the opportunity to learn, and something you took away from the conversation or shadow. Reflect on what you learned and review your notes. Ask yourself:

- What did I learn from this experience that I liked?
- What did I learn from this experience that I disliked?
- Did any other questions arise as a result of my conversation?
- Did any new ideas emerge as a result of my conversation?

AI and the Job Search

Artificial intelligence can be a valuable career development tool when used thoughtfully and responsibly. AI can help you prepare, practice, and refine your work, but it should never replace your own experiences, judgment, or authentic voice.

Career Activity	AI Can Help You...	You'll Still Need To..
Career Exploration	Generate ideas	Choose a path that fits your goals
Resume	Tailor content	Tell your authentic story
Employer Research	Summarize information	Decide what matters
Interview Prep	Practice responses	Build confidence and communicate naturally
Networking	Draft messages	Build genuine relationships
Offer Evaluation	Compare options	Make the final decision

Incorporating AI skills into your resume

Employers aren't hiring you simply because you know how to use Copilot, ChatGPT or another AI tool. They're hiring graduates who can use emerging AI technologies to solve problems, communicate effectively across teams, analyze information critically, and make sound business decisions. As AI becomes more integrated in the workplace, it's important to show not only that you're comfortable using these tools, but also how you've applied them responsibly to create value. Below are a few examples of how AI-supported experiences might be reflected on a resume.

NACE Competency	Resume Example
Career & Self-Development	Self-taught generative AI tools to improve research efficiency and streamline project workflows.
Communication	Used AI-assisted editing to improve the clarity and organization of client presentations while ensuring all content was reviewed and personalized.
Critical Thinking	Evaluated AI-generated market research, verified findings with multiple sources, and presented recommendations to project stakeholders.
Leadership	Led a team in responsibly integrating AI tools into project planning, improving efficiency while maintaining quality and accountability.
Professionalism	Applied AI tools responsibly while maintaining confidentiality, protecting sensitive information, and ensuring the accuracy of final deliverables.
Teamwork	Used AI to summarize meeting discussions and organize project tasks, improving collaboration across a four-person team.
Technology	Leveraged generative AI and data analysis tools to automate repetitive tasks and improve reporting efficiency.

Using AI to Make Better Business Decisions

Artificial intelligence is changing the way work gets done across every industry. The most successful business professionals don't rely on AI to make decisions for them, instead they use it to enhance critical thinking, improve efficiency, and support better decision-making. AI is most valuable when paired with sound judgment, ethical decision-making, and strong communication skills. The examples highlighted below showcase how AI literacy can strengthen the career competencies employers value most.

NACE Career Competency	How AI can support. . . .
Critical Thinking	Evaluating AI outputs, identify assumptions, and make informed decisions.
Technology	Using AI tools effectively, efficiently, and responsibly.
Communication	Refining ideas, tailoring messages, and clearly explaining AI-assisted work.
Professionalism	Protecting confidential information, understanding ethical considerations, and maintaining accountability.
Leadership	Guiding teams in using AI thoughtfully while keeping people and strategy at the center.
Career & Self-Development	Staying curious, adapting to emerging technologies, and continuously building AI literacy

For International Students

The hiring process in the United States is much more complex for international students than domestic students. This section offers a brief overview of how hiring and work authorization work for international students.

Internship hiring

If, like most international students at Iowa, you are on an F-1 student visa, you can take on summer employment with hardly any paperwork on the employer's part through curricular practical training (CPT). With CPT, the University of Iowa issues the work authorization.

Full-time hiring

Students on an F-1 visa are eligible to work in the U.S. for 12 months following graduation through optional practical training (OPT). You can apply for OPT between 90 days prior to graduation and 60 days after graduation, and you do not need a job offer in order to apply. At the end of the OPT period, your employer will need sponsor a visa, most commonly an H-1B visa, so that you can continue to work in the United States. The most important things to remember about the H1-B program are the annual cap and the application timeline. The U.S. government issues a finite number of H1-B visas every year, and in recent years the quota has been reached on the day the application opens.

For business analytics students only: International Tippie undergraduates in the business analytics major are eligible for an OPT extension, which allows you to work in the U.S. for a total of 36 months (12-month regular OPT period plus a 24-month extension) before requiring visa sponsorship. As of the 2023 list of STEM-designated degrees published by the U.S. Department of Homeland Security, business analytics is the only major at Tippie that's currently eligible for an OPT extension.

Tracking Your Progress

None of us have the power to determine recruiting timelines—on the contrary, you will often be left questioning them. However, you do have the opportunity to influence how you manage this process from your side, including how you track your progress. You will be encouraged to maintain a tracking mechanism for your application process, including key information and contacts associated with each company and role. The table below is a recommended framework; TCS has created an editable version you can download at

<https://students.tippie.uiowa.edu/tippie-resources/career-services/undergraduate-career-services/undergraduate-career-resources-0>

Date	Company	Title	Application outcome	Networking contacts	Referral source
9/15/20	AEGON USA	LDP Internship	Invited to interview; No offer	John Smith (title, phone, email) Jane Doe (title, phone, email)	On Campus
9/18/20	Best Buy	SFA Intern	Applied; not invited	Kevin Jones (title, phone, email) Ashutosh Sethi (title, phone, email)	Alumni Outreach
9/20/20	St of Wisconsin Investment Board	Associate	Invited; 2 rounds; Offer	Paula Duong (title, phone, email) Sasha Johnson (title, phone, email)	Job Posting
9/26/20	Google	Summer Assoc	Applied; not invited	Deeksha Agrawal (title, phone, email)	Career Website

Career Competencies

The below list of competencies is adapted from the National Association of Colleges & Employers' 8 Competencies for a Career-Ready Workforce. They can be a useful way to benchmark your own skills and check for blindspots in your professional experience. For more information, visit <https://www.nacweb.org/career-readiness/competencies/career-readiness-defined/>

Career & Self-Development:

- Personal and professional development
- Awareness of strengths and weaknesses
- Networking and taking advantage of opportunities

Critical Thinking:

- Identify and respond to needs
- Understand situational context
- Logically analyze relevant information

Professionalism:

- Understand and demonstrate effective work habits
- Adapt behaviors to each workplace's unique needs
- Act in the interest of the larger community

Technology:

- Understand and leverage relevant technologies
- Practice ethical technological citizenship
- Utilize technological tools for efficient task completion

Communication:

- Clear and effective exchange of ideas and perspectives
- Ability to communicate both inside and outside an organization.

Leadership:

- Recognize and utilize personal and team strengths
- Work towards organizational goals.

Teamwork:

- Build and maintain collaborative relationships
- Work effectively toward common goals
- Recognize diverse viewpoints and shared responsibilities

Student Org List

Student organizations are a valuable place for making connections and gaining opportunities to network. The list below shows student organizations available at Tippie at the time this guide was published; for up-to-date information and more details about student orgs at Tippie, visit

“Who Am I?” - Career Inventory Worksheet

The purpose of this activity is to help you determine what your strengths are, what you’re good at or like to do, and what is important to you. This will provide the basis for you to determine your Transferable Skills later, which will help build a strong resume and cover letter and also to formulate answers to interview questions.

1. What are your top 5 strengths? (use Strengths Finder or other resources to get started)

- a.
- b.
- c.
- d.
- e.

2. What are your top 5 skills?

- a.
- b.
- c.
- d.
- e.

3. What part-time jobs have you had? If more than 5, list the 5 most impactful.

- a.
- b.
- c.
- d.
- e.

4. What internships have you had? If more than 5, list the 5 most impactful.

- a.
- b.
- c.
- d.
- e.

5. What 5 things do you want most out of your work environment?

- a.
- b.
- c.
- d.
- e.

Application Materials

Resume

Your resume shows potential employers your qualifications, background, and relevant skills. A good resume is ideally a single-page document that summarizes your most relevant coursework, work experiences (jobs, internships, etc), leadership background, and other skills. This chapter includes four resume templates that are appropriate for early-career professionals; major-specific sample resumes are also available in the major sections at the start of this guide.

Summarizing your achievements

It's important to go beyond just your "duties" at a job when describing experience on a resume. One way to do this is to think of the "5 W's and an H" rule:

WHO – Who did your job help? The company? Clients? Customers?

WHAT – What happened with the results of the job? If you did research, was that information published? If you had to do a report what was done with that information?

WHEN – When did this happen? Daily? Weekly, Monthly? Talking about how often you did something is a straightforward way to show productivity in your job.

WHERE – Where did your duties occur? Did you have to travel for a job? Were you responsible for interacting with people outside of your organization?

WHY & HOW – Why did you do this? How did your job duties help or add to the organizations ability to function?

Below is an example of how to rework resume content to make it stronger:

BEFORE

American Marketing Association (AMA) Member Fall 2023–present

- Created personal brand
- Attended weekly meetings
- Volunteered at service activities and fundraising events

AFTER

American Marketing Association (AMA) Member Fall 2023–present

- Enhanced skills for future success and created own personal brand shared with 12 area employers
- Participated in bi-weekly meetings to expand knowledge of marketing concepts
- Attended and participated in four service activities and three fundraisers to apply learned theory

Applicant Tracking Systems (ATSs)

When you apply for a position through an online portal or a company website, your application will most likely be processed by an applicant tracking system (ATS). Not all companies use these systems; many small businesses and non-profit organizations may lack the resources to implement ATS software. In these instances, applications are typically directed straight to a talent acquisition manager's inbox. That said, most larger organizations, particularly those with multiple open positions and a high volume of applicants, rely on ATS to streamline the hiring process.

ATS software is designed to assist talent acquisition and recruitment professionals in tracking and managing candidate pipelines. Its primary function is to store and organize candidate application information, streamlining the hiring process. The system includes various stages that allow companies to track a candidate's progress throughout the recruitment cycle. For instance, if you're invited for an interview, the company will update your status to reflect this step. This process continues through each subsequent phase of the application process. Some companies manage their ATS manually, in which case a human will review your application, decide whether to move you forward, and provide updates as necessary. However, many modern ATS platforms use AI tools to automate these tasks. Not all ATS tools use AI, although many do. These systems are increasing in popularity as companies aim to become more technologically driven and efficient in their hiring processes.

When you apply for a position through an AI-managed ATS, the system will "read" your resume by scanning for key qualifications and relevant information to assess whether you're a strong match for the job. Candidates who meet the criteria are highlighted for the recruiter to review, and from there, the recruiter can easily select which candidates to invite for an interview. Depending on the company's hiring process, AI tools may handle the entire screening process (resume review, invite to interview, screening interview). Some systems even use "solo" video interviews with algorithmic analysis of a candidate's emotions, word choices, and personality traits to assess their potential fit for the role. While each ATS offers its own set of advantages and challenges, it ultimately comes down to what each company values most in their hiring process and how they choose to implement these technologies.

Formatting your Resume for an ATS Review

- Apply for positions where you meet the required qualifications or are well-positioned to grow into the role
- Use keywords found in the job description in your resume (the ATS will be able to match these with the job description)
- Include simple formatting that is easy to read, and draws the employer's attention from left to right (an AI-powered ATS reads the same way we do)
- Use concise, clear language that reflects your experience and shows why you're a fit for the role
- Make sure your resume is spelling and grammar error-free
- Use a resume optimizer tool that assists with ATS-friendly formatting

Adding Relevant Coursework to Your Resume

When should I include coursework on my resume?

Relevant coursework can help demonstrate the knowledge and skills you are developing through your academic program. In most cases, a “Relevant Coursework” or “Course Highlights” section is most helpful when you have limited internship, work, or project experience to highlight.

For example, if you are a sophomore applying for your first summer internship, listing relevant courses can help employers understand the foundational concepts and skills you have gained through your classes so far. This can provide helpful context for your academic preparation and show how your coursework aligns with the roles you are pursuing.

What courses should I include?

A maximum of six courses may be included in your resume. The courses you include should be major-specific or directly related to business topics that align with your intended career path or industry. Prioritize courses that highlight tangible skills, applied learning, or technical knowledge. This helps employers understand the practical abilities you are developing.

What if I’m currently taking a course I want to include?

If you are currently taking a course you would like to include on your resume, you may list it as part of your relevant coursework; however, be prepared to discuss with employers what you anticipate gaining from the coursework. Be sure to clearly indicate that the course is in progress (for example: “Intro to Taxation – In Progress”). This is typically the only time you should include a status for coursework, unless you are referencing the course in connection with specific takeaways, projects, or assignments you completed as part of that class.

Examples of how to include coursework on your resume (majors noted for context, do not add if starred):

Example 1: One option is to have a separate section titled ‘Relevant Coursework’ or ‘Course Highlights’. This section is best placed underneath your Education section and is a good option if you would like to utilize more space on your resume or strategically highlight the most relevant classes you’ve taken.

Relevant Coursework *(Accounting Student)

Income Measurement & Asset Valuation	Auditing	Managerial Accounting Analytics
Valuation of Financial Claims	Intro to Taxation	Financial Accounting & Reporting

Example 2: Another option is to incorporate your coursework directly within your Education section. This approach allows you to highlight relevant classes while making the most efficient use of space.

Education

University of Iowa Tippie College of Business	Iowa City, IA
Bachelor of Business Administration in Finance, and Risk Management & Insurance	Anticipated May 2028

Relevant Coursework: Investment Management, Corporate Finance, Principles of Risk Management, Enterprise Risk Management, Insurtech Innovation

Example 3: A final option is to highlight 1–2 courses in more depth by listing them in the form of an experience on your resume in a separate section. This works well for project-heavy courses or for showcasing coursework related to a certificate, concentration, or minor.

Course Highlights *(Marketing Major – Retailing & E-Commerce concentration)

Retail Strategies | MKTG:3400

Spring YYYY

- Analyzed retail site selection and store design strategies to evaluate how location, layout, and customer experience impact retail performance
- Explored supply chain and customer relationship management practices to understand how retailers improve efficiency and customer satisfaction

Merchandise Management | MKTG:3401

Spring YYYY

- Analyzed a retailer's merchandising and service mix across store and online channels, collaborating with a team to evaluate trends and develop data-informed decisions
- Presented findings and strategic recommendations on product assortment, promotion, and distribution strategy

Cover Letters

As a rule of thumb, if a job asks for a cover letter, it is in your best interest to write one. Whether it the letter is required or preferred, it offers a good opportunity to showcase your writing skills, address your interest in the job, and discuss other things you want to include. The cover letter also lets you further outline experiences listed in your resume and map them onto the job requirements.

You might choose to create a solid “base” cover letter and then tailor it to the position you are applying for, so you do not have to start from scratch with every application. If you decide to go this route, be sure you are adapting names, companies, roles, skills, and experiences accordingly. It is critical to review the job description and to pinpoint the key skills, qualifications, and language that are stated to address in your cover letter. Use the worksheet and template on pages 89 and 90 to guide yourself in writing a strong cover letter.

Templates in This Guide

This guide includes several templates and examples for resumes and cover letters, including:

- Our “basic” resume template (page 84)
- A resume template to highlight internship experience (page 85)
- A resume template to highlight projects you’ve completed (page 86)
- A resume template to highlight research experience (page 87)
- A resume template highlighting AI tool proficiencies & experience (page 88)
- Exemplar resumes for each major at Tippie (end of each major section)
- A worksheet for identifying key components to include in your cover letter (page 89)
- A cover letter template with structure and content guidelines (page 90)

You can download editable Word versions of these templates, as well as copies of the business resume checklist and TCS resume style guide, at <https://students.tippie.uiowa.edu/tippie-resources/career-services/undergraduate-career-services/undergraduate-career-resources/resume-career-support>.

TCS In-House Resume Style Guide

First edition

DATES

Use 3-letter abbreviations for all months with more than 3 letters (Jan, Feb, Mar, etc).

Write out full years (2008, not '08 or 08).

Always use an en dash (–), not a hyphen (-) or em dash (—) to denote a date range.

NUMERALS

Write out all numbers below 10 (one, two, three, etc.).

Use numerals for 10 and above (10, 11, 12, etc.).

Always use an en dash (–), not a hyphen (-) or em dash (—) to denote a numerical range of any kind.

FORMATTING

Do not use line breaks to add space between items; add a “space before paragraph” instead. Add a 6-point space between items in the same category (e.g. different work experiences listed in the EXPERIENCE section) and a 12-point space before each section header (EDUCATION, EXPERIENCE, etc).

Use right tab stops, NOT spaces or tab spaces, to left-align dates. A guide to using tab stops is available at <https://support.microsoft.com/en-us/office/set-or-change-the-tab-stops-2fcc4b98-a330-4f14-9ca7-6f8c6421e29e>

TCS CONVENTIONS

Capitalize the names of majors. Note that this is NOT typical of most style guides in other contexts; outside of a resume, you should only capitalize names of majors that are proper nouns (example major list in typical formatting: Spanish, geology, engineering, German literature)

Do not capitalize “the” when writing “the University of Iowa.” If you are listing education, write “University of Iowa,” not “The University of Iowa.”

Never use periods for items in bullet lists on a resume.

Only use the past tense when describing roles and responsibilities in a resume, even if they are ones you currently hold.

“Risk Management & Insurance” is the correct way to write the full name of the RMI major, using an ampersand (&) rather than “and.”

This guide was produced by Tippie Undergraduate Career Services, a division of the Undergraduate Program Office. It is loosely based on the APA style guide, which may be used to determine ideal practices for cases not listed here. Questions? Email tippie-careerservice@uiowa.edu.

Skills/Attributes

The skills listed below are important across most industries, roles, and functions. They may be found in job descriptions, especially for early-career job postings. Consider using these terms and varying synonyms in your application materials to show your fit for the role.

Analytical/Quantitative Skills = Forecasting, predicting, extracting important information, constantly learning and reflecting

Creativity = Suggesting ideas, imagining alternatives, initiating new ideas

Detail-oriented = Following directions, gathering information, managing details

Entrepreneurial/Risk-taking = Negotiating, persuading, selling ideas or products

Flexibility/Adaptability = Cooperating, enlisting help, open to difference

Friendly/Outgoing = Being sensitive, providing support for others, counseling

Initiative = Initiating new ideas, promoting change, accepting responsibility

Interpersonal Skills = Cultivating relationships, conveying feelings, perceiving feelings and situations

Leadership Skills = Finding common purpose/goals, articulating a vision, motivating, delegating with respect, managing groups, coaching

Organizational Ability = Reporting information, coordinating tasks, managing time, setting and meeting deadlines

Problem-solving Skills = Identifying problems, developing evaluation strategies, demonstrating web-like thinking

Strategic Planning = Identifying resources, setting goals

Strong Work Ethic = Being punctual, meeting goals, high standards for self, produce quality work/projects

Tactfulness = Providing appropriate feedback, enforcing policies

Teamwork = Collaborate, include, represent and empower others; willing to share credit/power, manage conflict,

Verbal Communication = Speaking effectively, listening attentively, receiving non-verbal messages, facilitating group discussions

Written Communication = Writing effectively and concisely

Business Resume Checklist

1. Format

- Easy to scan and follow; professional and aesthetically pleasing
- Concise & consistent (generally one page)
- ½–¾ inch margins all around
- 8.5 x 11 dimensions (letter paper size)
- Font size is between 10 and 12 points, except for name at the top of the page, which is larger
- Dates are right-aligned
- No periods after bullet-point statements
- Acceptable fonts include Arial, Calibri, Cambria, and Garamond

2. Heading

- Name is centered and in the largest font on the page (16–20 points, depending on space)
- Phone number and professional or school email address are present (Ulowa email preferred)
- Physical mailing address is NOT included
- Customized LinkedIn URL (if you have a completed profile that's ready for viewing)
- Professional website or portfolio (if relevant to your career)

3. Education

- Only schools from which you received (or are going to receive) degrees are listed, with graduation month and year or anticipated graduation month and year
- High school is NOT listed
- Degree(s) are spelled out and not abbreviated (Bachelor of Business Administration, not BBA)
- Major(s), minor(s), and certificate(s) are named, including concentrations or tracks, if applicable
- GPA is stated ONLY if over 3.5 (optional)
- Study abroad experience is noted (if applicable)
- Institutional honors and awards are listed (e.g. Dean's List); it is strongly recommended that annual awards like the Dean's List only be listed if you received them consistently without gaps

4. Experiences

- Internships, co-ops, on-campus jobs, and employment are listed
- Experiences are listed in reverse chronological order (most recent first)
- Month or season and year started and ended are included ("–present" if still working)
- City and state of the job are included
- Job title is included
- Major achievements and skills developed/used are listed in bullet point format
- Bullet point format is Action Verb (past tense) + Task + Result (vary verbs used)

ADDITIONAL INFORMATION

(recommend adding 1–2 as needed)

Skills: Technical and language

- Software, programming languages, methodologies
- Foreign languages and proficiency level
- Licensures, certifications, and micro-credentials

Class Projects

- Group and/or individual projects
- Appropriate to highlight 2–3 projects that are applicable to your desired career path/industry

Campus Involvement & Leadership

- Name of organization and leadership positions you currently hold or have held
- Utilize numbers and metrics; percentages can add clarity & value

Volunteering

- Name of organization and role
- Bullet statements about your role and function

Coursework

- Do NOT list ALL courses, but include up to six relevant, non-foundational courses
- Include the course name and subject, as well as when you took it

Cover Letter Worksheet

A cover letter is a critical component of a job application because it offers a personalized introduction to a prospective employer, showcasing your enthusiasm and qualifications for the position you're applying for. Use this worksheet to think about topics you can address in your cover letter – qualities, strengths, skills, accomplishments, competencies, professional experiences, and involvement. Don't include everything about yourself! Each cover letter you write should be tailored for the specific position and company you're applying to. Fill out the sections that are most applicable to you.

Unique Selling Proposition

What are your unique qualities and strengths? _____

What is it about this employer that attracts you? _____

How would you utilize your talents with this organization? _____

Professional Experiences & Career Readiness Competencies

What skills and abilities have you used to accomplish your work? _____

What accomplishments did you achieve? What are you most proud of? _____

Identify examples where you exhibited career readiness competencies employers are looking for. Pick your top three.

Career and Self-Development: _____

Communication: _____

Critical Thinking: _____

Equity and Inclusion: _____

Leadership: _____

Professionalism: _____

Teamwork: _____

Technology: _____

Coursework & Class Projects

Identify the knowledge, skills, and leadership qualities you have acquired through your coursework.

What class and group projects have resembled professional experience?

Campus & Community Involvement

What organizations have you been involved with? Any leadership positions? _____

What skills have you strengthened or developed? _____

Your Name
Your Address
Email | Phone

[The above information should follow the same format as your resume]

Date
Employer's Name & Title [specific recruiter or hiring manager, if known]
Company Name
Company Address

Salutation [specific name, if known, or terms like hiring manager, hiring committee, etc.],

The opening paragraph should seize the employer's attention. Tell them who you are, what position you are applying for, and if someone referred you. Those details can include the job title, the department, and the company name. Express your interest in the position and why you want to work for this company. List out the reasons that you'll be elaborating in your body paragraphs.

The body of the cover letter will provide reasoning and justifications as to why the hiring manager or recruiter should invite you for an interview and consider you for the role. Remember, resumes and cover letters go hand-in-hand; they should complement each other, not be duplicates. Your body can be 1-2 paragraphs long, depending on your qualifications, experiences, and space limitations. You will highlight relevant skills, experiences, and achievements that make you a strong candidate for this position.

It's best to tailor and align your content to the specific job you are applying for. Identify keywords and desired qualifications from the job description and ensure they are in your resume and cover letter. The keywords will help show the employer how your background aligns with the company's needs. It's also important to provide specific examples and not be too general. Select a few experiences from your resume to feature the skills they are seeking. When addressing your skills and accomplishments, ensure there is a direct correlation to what the employer seeks in that job.

The closing paragraph is your final chance to hit home with the employer. In this section of the cover letter, you'll reiterate your interest in the position and company stated in the opening paragraph. You may also use this space to address any gaps in your resume or from the requirements/qualifications of the job. Gaps could be but are not limited to degree type, GPA requirement, years of experience required, etc. Share why despite these gaps, you're still a strong candidate. Express your enthusiasm for potentially joining the team and receiving an opportunity to interview. Thank the employer for reviewing your application.

Closing Salutation [sincerely, best regards, thank you, etc.],

[Your actual signature]

Typed Name

LinkedIn Profile and Page

Along with serving as a virtual resume, LinkedIn is also a powerful networking tool. Your LinkedIn profile could be the first professional impression a potential employer has of you, so it should be complete and up to date. Employers often research interviewees online before an interview to learn more about them. If your interviewer runs across outdated or inaccurate information, it could give them a bad impression of you.

Strengthening Your Profile

Headline

The LinkedIn Headline appears just below your name on the profile page. You are limited to 220 characters, so you should decide if you would like to use your job title, job status, or a string of keywords that describe your talents, expertise, and goals. We encourage the use of symbols (| or / or -) to help break up your topics.

Headline template: [College/Major] Student | Interested in [1–3 Areas] | [Key Skills or Tools]

Example: Finance & Business Analytics Student | Interested Financial Analysis & Investment Banking | Skills in Python, Excel, SQL

LinkedIn keywords for majors

Accounting: financial statements, bookkeeping, audit, tax, internal controls, compliance, cost accounting

Business Analytics: Python, Excel, visualization, data cleansing, forecasting, SQL, dashboarding

Economics: micro, macro, theory, research, analysis, banking, econometrics, policy analysis

Entrepreneurship: innovation, pitching, product development, business models, market validation, venture strategy

Finance: financial modeling, valuation, corporate finance, analysis, capital, capital markets, risk management

Management: leadership, project management, planning, coordination, HR, operations, organizational behavior, strategic management

Marketing: content strategy, market research, branding, social media, consumer behavior, target, digital marketing campaign analytics

RMI: risk assessment, insurance principles, underwriting, claims management, loss control, regulations, enterprise risk management, actuarial analysis

Profile picture/banner

People remember what they see, and your network wants to see you! When it comes to your profile picture, keep the following in mind:

- Professional dress (formality differs by industry)
- Smile and look directly into the camera
- Include a banner that reflects your expertise, interests, industry, and values. Tippie provides banners for students, staff, and alums at <https://tippie.uiowa.edu/alumni/linkedin-headers>

Tippie students in need of a headshot can use the free professional headshot photo booth on the third floor of the Pappajohn Business Building (South side).

Industry

When recruiters conduct advanced searches for candidates on LinkedIn, they often filter results by industry. When creating or updating your profile, make sure to add the industry that best applies to your current career or the field you are trying to move into. Check out the common industries of each major on the second page of our flash

reports, available to download at <https://students.tippie.uiowa.edu/tippie-resources/career-services/undergraduate-career-services>

About section

The LinkedIn 'About' section is the digital equivalent of an elevator pitch: 2,600 characters or less and readable in 10-15 seconds. It is completely appropriate to write in the first person; "I" statements are inviting and a little more casual. Also, remember that the first two lines of text (or fewer) of your summary are all that people will see when your profile appears in a search.

Skills & endorsements

List 5-6 select skills that suit your career direction; think about classes, work, and volunteer experiences, and qualifications you're developing as a University of Iowa student. To see relevant technical skills under each major, scroll to the end of each Major section to 'Relevant Tools' before our resume templates.

Experiences

Break apart your responsibilities and accomplishments into bullet lists. For each position you have held, write one or two sentences about the position, and then think of four to five responsibilities and/or accomplishments and put them in list format (these can be shorter and more casual than your resume). This will fill out your profile and make it easy for potential employers to read.

Education

Adding your programs of study (majors, minors, certificates, concentrations), institutions, certifications, and licenses is important, but even more important is tying these achievements to a date. This date indicates when your degrees or certificates will be earned/completed.

Networking on LinkedIn

- Follow companies of interest: learn about their values and goals, stay updated on their internship/job opportunities, and stay engaged with their posts
- Join groups: join ones related to your interests, majors, etc. Participate by asking questions, engaging with posts, commenting on discussions, and more
- Reach out to connections with a purpose and always know WHY you are reaching out or connecting. Personalize messages and stay engaged; after connecting, continue to like, comment, share, and build on the relationship. Follow people who are in roles or companies that you admire and who share professional advice regularly.

What can I post about?

Always keep it professional. Projects, research, achievements, internship/job experiences, events and workshops, and thanking mentors/professors are great places to start

How often should I post?

Once a month is a good rule of thumb; this shows that you are active and doing things to build yourself professionally. Aim for quality over quantity. However, try to engage with others' posts weekly, if not daily – this keeps you active when you aren't posting yourself

Sample LinkedIn Messages

When crafting LinkedIn messages, be sure to provide context for the recipient – especially if this is your first outreach. Start by briefly introducing yourself, then clearly explain why you’re reaching out. Keep your message concise (you get 200 characters per message) while highlighting any connection you share and outlining your specific interests. If this is someone you are reaching out to based on a mutual connection, ensure you get permission before mentioning your mutual connection’s name.

Remember: if you don’t have a LinkedIn Premium, you can only send messages with five connection requests per month. Make each one count!

Outreach to a company or recruiter after an application:

Hi [Name], I’m a Tippie [Major] student who recently applied for [Job Title]. With experience in [Skill/Experience], I’m confident I can contribute to your team. I look forward to connecting!

Outreach to a new networking connection:

Hi [Name], I’m [Name], a [major/year] at the University of Iowa. I enjoyed your insights on [specific topic] and would love to connect as I explore opportunities in [industry/field] (OR) I’d love to connect as I continue exploring career paths and learning from professionals in the field. Thank you for considering my request! [NAME]

When should I follow up with connections after my initial outreach?

The simple answer is that it depends on the type of outreach you are doing. Follow-ups will vary based on your relationship, context, and goals. Overall, as you’re connecting, keep the 3x7 rule in mind for most outreach – no more than three attempts, spaced at least seven business days apart. Professionals are busy, but consistent, respectful follow-up shows genuine interest and professionalism without coming across as overly persistent.

General LinkedIn tips

- Customize your LinkedIn URL before adding it to your resume. On your profile, click ‘Edit public profile & URL’ then select the pencil icon next to your URL to edit it, choose something clean and professional (most often your name) - this looks best on resumes.
- The Tippie College of Business has its own LinkedIn page. Go to the ‘Alumni’ tab to find potential contacts: <https://www.linkedin.com/school/university-of-iowa-tippie-college-ofbusiness/>
- You can re-order skills on your LinkedIn profile. For example, if you have multiple skills listed, we recommend highlighting your top two that are most relevant to the roles you’re seeking, so they appear when someone is viewing your profile.
- Check out the LinkedIn Learning platform, located on your home page under the ‘For Business’ tab. Click on ‘Learning’ to access thousands of free online courses. You can utilize self-paced courses to build your skillset in particular areas of interest, different platforms or software, and more!
- Need assistance building your profile? Schedule an appointment with a Tippie Career Services Specialist on MyUI for personalized guidance.

Pitch Worksheet

Use this worksheet with support from your TCS career specialist to organize your stories and create a pitch that highlights your value, talents, expertise, and career direction. Example pitches for applicants with different levels of work experience are included after this page.

First, identify three experiences that you would like to highlight related to work. These may be from internships or full-time jobs, leadership and extracurricular activities, and/or academic projects that will make you stand out. These experiences are typically accomplishments you are particularly proud of, made a significant impact doing, and are unique within the industry or among your peers. They should highlight your specific skills and expertise.

Next, list two details related to that experience that are important to share when you speak to others—hiring managers, recruiters, alumni, and faculty. Details might include (but are not limited to): tools used, dedicated time and length of project, solution identified, dashboard created, recommendations given, cross-functional teaming and leadership, revenue generation, or savings of time, money, or equipment.

I. _____

A. _____

B. _____

II. _____

A. _____

B. _____

III. _____

A. _____

B. _____

Example Pitch (less experience)

- I. **Small Format Team Member, Target**
 - a. Collaborated across departments to restock and manage inventory while supporting guest to deliver an exceptional shopping experience
 - b. Trained new team members on store operations and POS systems during peak seasonal periods
- II. **Member, American Marketing Association**
 - a. Attended professional development workshops on various marketing topics to gain exposure to marketing tools and industry trends
 - b. Engaged with peers and guest speakers to explore career pathways and build connections
- III. **First-Year Honors Seminar Capstone Project**
 - a. Consulted with a local nonprofit to identify ways to improve community outreach and engagement
 - b. Conducted research with a 5-person team and presented on actionable steps to strengthen the organization's communication methods

Pitch in Practice

Hi, I'm Herky! I'm a first year direct admit business student. I currently work as a Small Format Team Member at Target where I manage inventory, support guests, and train new team members during busy seasons. I recently joined the American Marketing Association where I attend weekly workshops on marketing concepts and connect with industry professionals to explore career paths. While I'm still undecided on what business major to study, I'm leaning towards marketing. At Iowa, I'm in the Honors Program and in my first-year seminar, I completed a capstone project consulting with a local nonprofit to improve their community outreach efforts. My team researched engagement strategies and presented actionable steps to strengthen their community connections. These experiences have built a foundation of skills in customer service, marketing, and teamwork, which is why I'm excited about opportunities at your company.

Example Pitch (more experience)

- I. **Financial Analyst Intern, Wellmark**
 - a. Created dashboards using Excel and Tableau to monitor financial performance metrics across departments
 - b. Collaborated cross-functionally with underwriting and actuarial teams to evaluate cost-saving strategies
- II. **Vice President of Professional Development, InvestHer**
 - a. Coordinated a semester-long workshop series on "Women in Finance" for over 60 members
 - b. Partnered with corporate partners and alumni to host 5+ industry and networking events
- III. **Sponsorship Chair, Dance Marathon**
 - a. Secured over \$10k in community sponsorships by partnering with local businesses in Iowa city
 - b. Co-managed a team of 12 committee members by delegating tasks to achieve fundraising goals

Pitch in Practice

Hi, I'm Herky and I'm studying Finance with a certificate in Leadership. Last summer, I interned at Wellmark as a Financial Analyst where I built dashboards in Tableau and partnered across teams to identify cost-savings strategies. On campus, I serve as the VP of Professional Development for InvestHer, a student organization committed to building knowledge and networks in finance for its members. In this leadership role, I led a "Women in Finance" workshop series and organized networking events with alumni and industry partners. I'm also a Sponsorship Chair for Dance Marathon, an organization I'm deeply passionate about and have been a part of since freshman year. I helped raise over \$10k through business partnerships and led a 12-person committee to support our fundraising efforts. These experiences have strengthened my skills in data analysis, team collaboration, and leadership, all of which I'm excited to bring to this rotational analyst role.

Interviews and Offers

Preparing for an Interview

A successful interview starts before you step foot in the office. Here are tips on how to prepare and present yourself as a strong candidate.

Responding to an interview invitation

When you're offered an interview, respond to the interviewer or hiring employee with an email that includes the following:

- Thanking them for the interview.
- Telling them why you are excited about the position and the company.
- Listing three or four things that make you ideal for the position.
- Telling them that you look forward to being able to share more during the interview.

Do your research

Finding out more about the company and position helps you know if the job is a good fit for you. It also helps you discover what the company is looking for in employees, and it will help you create informed questions.

Research sources

- The company's website
- Someone who works at the company
- Job descriptions
- Company information sessions and career fairs
- Your professors
- Faculty and staff

Collect stories

Just as your resume shares your skills and abilities, "power stories" are 60-second examples you can share with an interviewer that demonstrate your strengths. To develop your resume and your stories, consider experiences that show:

- Motivation and initiative
- Analytical and organizational skills
- Strong communication skills
- Leadership
- Responsibility

Develop four or five of your best power stories. Each story should first explain the situation or task with which you were faced. Then explain the action you took and what the result was. Practice telling these stories so you will be ready to use them in an interview.

Prepare questions

For each interview, it's important to come prepared with thoughtful questions. While many questions may arise naturally during a more conversational interview, having a few (at least 5) prepared in advance demonstrates your interest and engagement. Don't forget – this is also your chance to assess the organization and figure out if you really want to work there. Below are some examples to get you started, however, don't be afraid to build off what you and the interviewer discuss in your interview – for example, you might want to follow up on a specific project they mentioned that the team is working on, and how this role would contribute to that.

- What metrics or goals would my performance be evaluated against?
- What are the most immediate projects I would take on?
- What does growth look like for this role? **OR**, Where have successful employees previously in this position progressed to?
- What would onboarding and training look like for this role?
- Can you tell me about the biggest challenges I would face in this role?
- How do you support the learning and development of your team members?
- I know one of your company values is [company value]. How does this manifest in the workplace?
- Can you describe the team dynamics and office culture?
- What would you say are the team's strengths, and are there any skills missing you're looking to fill?
- What are the current goals the company is focused on, and how does this team support hitting those goals?
- What part of your role are you most excited about, and what attracted you to come to [company name]?
- What is your leadership style?
- What do you like most about leading this team?
- What resources or support would be available to me to help me succeed in this position?
- What challenges or opportunities do you see in the industry that the company is focused on?

For more tips about wrapping your interview successfully, asking meaningful questions, and what questions NOT to ask, go to page 113 in this guide to our 'Closing the Interview' section.

The Interview

Arrive 15 minutes early. Smile and make eye contact throughout the interview. Your appearance is important, and your wardrobe should align with the company's culture. During the interview, make sure to listen carefully. When you share your power stories, do it with enthusiasm. Ask your questions after the interviewer has finished asking theirs.

Before you leave:

- Thank the interviewer
- Tell them you have enjoyed meeting them and learning more about the company
- Ask about decision timing
- Get their business card
- Shake hands

After the interview

Send a thank-you note to the interviewer within 48 hours. This should be unique and tailored to the individual interviewer and job application.

Three main points to a post-interview/meeting thank you note:

- Thank the person for meeting with you
- Mention something you liked or found interesting about the interview
- Repeat your interest in the job & mention next steps

Spend some time thinking about how the interview went; this can help you reflect on how to improve your interviewing skills and decide whether the position is a good fit for you. Ask yourself:

- Who interviewed me? What was their role? What reaction did they seem to have to me?
- What was my overall impression of the interview?
- What things did I do or say that seemed to impress the interviewer?
- What is my impression of the job? Can I see myself doing it?
- What is my impression of the company? Can I see myself there? What are the duties of the job?

Company Research

As you begin to prepare for the interview process, you will want to educate yourself on the company, including key facts about the organization, why you are interested and—most importantly—why you are a fit. The below worksheet provides a framework for your research.

COMPANY/INDUSTRY	KEY PLAYERS (Top management & Tippie alums, if applicable)
ABOUT THE ORGANIZATION	BRANDS/PRODUCTS/SERVICES
TRENDS AFFECTING THE FIRM	RECENT NEWS
WHY ARE YOU INTERESTED?	WHY ARE YOU A FIT?

LIST 3-5 KEY SKILLS/COMPETENCIES YOU HAVE THAT ALIGN WITH THIS ROLE/COMPANY.

HOW WILL YOU ARTICULATE THESE UNIQUE STRENGTHS TO THE COMPANY TO DEMONSTRATE YOU ARE THE BEST CANDIDATE?

3-5 QUESTIONS FOR THE INTERVIEWER (OR ALUMNI WITHIN THE ORGANIZATION).

Behavior-Based Interviewing

The most prevalent interviewing style, behavior-based interviewing, requires candidates to draw upon past experiences to demonstrate knowledge or skill in a specific area. Potential employers will pre-determine the primary skills needed to successfully perform in a role, and then ask pointed questions to determine if a candidate has the necessary skills. The logic behind this technique is that past behaviors are the best indicators of future performance. Behavioral questions begin with “Tell me about a time when...” and focus on assessing business competencies such as (but not limited to) leadership, strategic thinking, analytical skills, and creativity.

The STAR Method

The STAR method is a structured manner of responding to a behavioral-based interview question by discussing the specific **situation**, **task**, **action**, and **result** of the situation you are describing. Rather than improvising stories in an interview, which can cause your answers to be unfocused, use this method to build out compelling, intentional stories ahead of time.

Situation: Describe the situation that you were in or the task that you needed to accomplish. You must describe a specific event or situation, not a generalized description of what you have done in the past. Be sure to give enough detail for the interviewer to understand. This situation can be from a previous job, from a volunteer experience, or any relevant event.

Task: What goal were you working toward?

Action: Describe the actions you took to address the situation with an appropriate amount of detail and keep the focus on YOU. What specific steps did you take and what was your contribution? Be careful that you don’t describe what the team or group did when talking about a project, but what you actually did. Use the word “I,” not “we” when describing actions.

Result: Describe the outcome of your actions and don’t be shy about taking credit for your behavior. What happened? How did the event end? What did you accomplish? What did you learn?

Make sure your answer contains multiple positive results. Make sure that you follow all parts of the STAR method. Be as specific as possible, without rambling or including too much information. Oftentimes students must be prompted to include their results, so try to include that without being asked. Also, eliminate any examples that do not paint you in a positive light. However, keep in mind that some examples that have a negative result (such as “lost the game”) can highlight your strengths in the face of adversity.

SAMPLE STAR RESPONSE:

Situation (S): Advertising revenue was falling off for my college newspaper, The Review, and large numbers of long-term advertisers were not renewing contracts.

Task (T): My goal was to generate new ideas, materials and incentives that would result in at least a 15% increase in advertisers from the year before.

Action (A): I designed a new promotional packet to go with the rate sheet and compared the benefits of The Review circulation with other ad media in the area. I also set-up a special training session for the account executives with a School of Business Administration professor who discussed competitive selling strategies.

Result (R): We signed contracts with 15 former advertisers for daily ads and five for special supplements. We increased our new advertisers by 20 percent over the same period last year.

Learn more about the STAR method at <https://students.tippie.uiowa.edu/tippie-resources/career-services/career-guide/interview-process/behavior-based-interviewing/star-method>.

Preparing for a Behavioral Interview

- Recall recent situations that show favorable behaviors or actions, especially involving course work, work experience, leadership, teamwork, initiative, planning, and customer service.
- Prepare short descriptions of each situation; be ready to give details if asked.
- Be sure each story has a beginning, middle, and an end, i.e., be ready to describe the situation, including the task at hand, your action, and the outcome or result.
- Be sure the outcome or result reflects positively on you (even if the result itself was not favorable).
- Be honest. Don't embellish or omit any part of the story. The interviewer will find out if your story is built on a weak foundation.
- Be specific. Don't generalize about several events; give a detailed accounting of one event.
- Vary your examples; don't take them all from just one area of your life.

Source: <https://www.vawizard.org/wizard/home>

Sample Questions – Behavioral Interviewing

General

- Tell me about yourself.
- If I were to speak with your former supervisor, what would they say are your greatest strengths, and what are areas of needed improvement? What would your classmates tell me about you?
- What is the biggest risk you have ever taken?
- What is unique about you? What can you bring to our company that other candidates cannot?
- Tell me something about you that I would not learn by reading your resume.

Analytical skills

- Tell me about a time when you discovered a more efficient way to complete a task.
- Tell me about a task that tested your analytical abilities.
- Tell me about a tricky situation for which you found a simple solution.
- Recall a scenario where you had to present complex data findings to a non-technical audience.
- Tell me about an assignment you worked on in which you had to amass a large amount of data and then analyze it.
- Can you tell me about a situation where your analysis of a problem was deemed to be incorrect? What would you have done differently?

Leadership

- Tell me about a situation at work or in academics where you led a team well.
- What leader do you most admire and why?
- In what situations do you prefer to use your leadership skills? Can you give me examples?
- Describe an experience where you had to lead a team. What was the outcome?
- What five qualities do you feel define great leadership?
- When leading a team, how do you keep each member of the team involved and motivated while keeping morale high? Describe the steps you take to achieve this.

Creativity

- How often do you discuss and work with colleagues to think up new systems and styles of working?
- Imagine you could trade places with anyone for just a week. The person could be famous or not famous, living or from history, real or fictional. With whom would you trade places?
- If someone wrote a biography about you, what do you think the title should be?
- If you had to be shipwrecked on a deserted island, but all your human needs - such as food and water - were taken care of, what two items would you want to have with you?
- If you could have dinner with anyone from history, who would it be and why?

Communication skills

- How would your co-workers describe your communication style?
- Tell me about a time when your opinion was challenged. How did you manage it?
- Give me an example of a time when you had to sell an idea.
- How do you adapt your communication style to different audiences?
- When you have entered a new workplace in the past, describe how you have gone about meeting and developing relationships with your new coworkers and supervisors.
- Describe a time when you had to convince a person or group to re-evaluate their decision.

Technical Interviews

At this point, you have started to generate stories from your prior experience that address the various competency/skill areas that are most widely sought by graduate hiring companies. As you progress through an interview process with a company you should be prepared for the interviews to get more challenging—with far greater emphasis placed on assessing your technical skills and functional expertise. The “technical interview,” as it is often referenced, seeks to understand if you have the technical capacity to operate at an elevated level within a specific career path. This can include questions to assess overall knowledge of a function, as well as questions designed to dig deeper into your problem solving, critical and creative thinking skills, and your passion for the field.

Sample Questions – Technical Interviewing

Finance

- Why might a company choose debt over equity financing, or vice versa?
- How will a decrease in financial leverage affect a company's cost of equity capital, if at all? How will it affect a company's equity beta?
- What are the different ways to value a company?
- What is the difference between a DCF and comps?
- What is the difference between enterprise value and equity value?
- Which of the three financial reporting statements (balance sheet, income statement, statement of cash flows) is most important and why do you believe this is so?
- How does depreciation affect each of the three financial statements?
- What is your best investment idea right now?
- If I gave you a million dollars, how would you invest the proceeds?
- What is your investment style?

- What sources of information would you use to analyze a company?
- What is the difference between IRR, NPV, and Payback?
- What is the difference between I-banking and Private Equity?

Strategy

- How would you describe the term 'strategic thinking'?
- Outline in broad terms how you would create a strategy for instance, a public campaign. As part of this strategic campaign, why should you conduct a SWOT analysis?
- How should you go about identifying partners as part of any good business or organization strategy plan?
- As you develop a strategic vision for your organization, what are the five key criteria on which you should focus?
- Discuss the importance of establishing an appropriate basis for comparison in assessing strategic capability.
- What are the three most common reasons why change in management fails in most organizations?

Business Analytics

- How would you approach a new data analysis project from start to finish? Explain how you identify the business problem, gather requirements, clean data, analyze results, and communicate recommendations.
- Compare linear regression and logistic regression. When would you use each model, and how would you explain the difference to a non-technical stakeholder?
- Describe a time when project requirements changed or you had to work with a difficult stakeholder. How did you adapt while ensuring the analysis still met the business objectives?
- Describe your data cleaning process. How do you identify missing values, duplicates, inconsistencies, and outliers, and why are these steps important before analysis?
- Explain SQL joins, including inner, left, right, and outer joins. Describe a real-world example of when you've used one or more of these joins in a project.
- What is the difference between descriptive analytics and predictive analytics? Explain when you would use each approach and provide an example of how each supports business decision-making.

Operations and supply chain

- What factors would you consider in determining the location of a distribution center?
- How would you improve the utilization of a process?
- You must process 50 units and have two options. In the first, you can start two lines with 1% defect rate and a capacity of seven units an hour. In the second option, you can start three lines with fewer people but a higher defect rate and a higher capacity. Looking at overall picture, which process is more efficient and why?
- It costs \$200 to train a new person, and a training session has an overhead cost of \$2000. You have 220 people to process in the coming months. Given the normal attrition rate, you expect to lose 40 of the trained employees. Does it make sense to call for overtime or add new folks?
- You have a fixed budget, and heat in the building is causing increased attrition. Also, as your productivity targets are revised upwards each year, you want to buy a couple of machines, which would dramatically improve productivity. In particular, the machines would improve the productivity of the best associates by

at least 20%, but these are the same folks who are threatening to walk out if something is not done about temperature. What would you do?

Consulting

- What are the three most common reasons why change in management fails in most organizations?
- What background do you have that would be helpful in consulting?
- Why consulting?
- How do you think the consulting industry is structured?
- What are the differences among the consulting firms that are important to you?
- What were the sales of your last employer? What was its profitability?
- Are you a generalist or specialist? Where do you see yourself specializing?
- Are you competitive?
- How are you going to make your decision if you get more than one offer?

Programming Interviews

Programming interviews are sometimes used in the field of business analytics and data processing. Programming and programming interviews are always evolving and changing as the world becomes more technologically integrated. Programming interviews help companies assess candidates in a neutral skill-based manner and alleviates the financial pressure that comes with attempting to recruit candidates.

What to expect in a programming interview

Programming questions may involve selecting data from a source, writing a program, calculating, and sorting data, or providing statistics. Programs you should be familiar with, depending on job requirements, may include SQL, R, Python, Stata, SPSS, Tableau, PowerBI, and/or Excel. You should know ahead of time based on the job description which tools and languages you will need to know to succeed.

Interview Stories Worksheet

Crafting Your Interview Stories for Optimal Results

The below competency areas represent those you can expect to encounter most frequently during the interview process. Each section will guide you through using the STAR method to craft a story that supports your candidacy.

Analytical Skills

Example question about this area of competency: Tell me about a time when you had to work with a large amount of data.

SITUATION:

TASK:

ACTION(S):

RESULTS:

Leadership

Example question: Tell me about your most significant leadership experience.

SITUATION:

TASK:

ACTION(S):

RESULTS:

Technology skills

Example question: Tell me about a time when you utilized a completely new/different approach to a situation.

SITUATION:

TASK:

ACTION(S):

RESULTS:

Communication Skills

Example question: How would former coworkers describe your communication style?

SITUATION:

TASK:

ACTION(S):

RESULTS:

Professionalism

Example question: Tell me about two goals you have set for yourself in the last year. Did you achieve them?

SITUATION:

TASK:

ACTION(S):

RESULTS:

Project Management Skills

Example question: Describe a failed project you were involved with at work and explain why it wasn't successful.

SITUATION:

Conflict Management

Example question: Tell me about a situation at work in which you experienced conflict and how you resolved it.

SITUATION:

TASK:

ACTION(S):

RESULTS:

Ethics & Integrity

Example question: Describe a situation in which you faced an ethical challenge in the workplace and how you resolved it.

SITUATION:

TASK:

ACTION(S):

RESULTS:

Case Interviews

Case interviewing technique: assessing your critical thinking skills

Case interviewing can be more broadly defined as problem solving. This technique is used to assess your skills in fields requiring strong analytical and quantitative skills, the ability to demonstrate structured problem solving skills, as well as other less obvious but equally important competencies such as active listening, interpersonal and communication skills, business acumen, performance under pressure, creativity, ability to navigate change, address problems in a logical way, synthesize the findings, and articulate these results in a concise manner to the interviewers. Case interviewing has historically been reserved for large consulting firms, but in recent years, other companies have started to adopt this style of questioning to gain a deeper understanding of a candidate's ability to assess a problem (typically a specific issue facing a particular company), analyze the situation, identify key issues, and articulate how you would address the problem. The case may not be related to the job you're applying for, or even to the industry the role is in; in this type of interview, matching your answers to the job description matters less than showing your ability to think critically, ask good questions, and analyze newly presented information.

Your Goal:

- Identify a problem
- Recommend a solution
- Not necessarily a "right" answer

Company is Assessing:

- Ability to determine what information is needed (needs assessment)
- Ability to problem solve within defined timeframe
- Quantitative skills
- Thought process
- Ability to function under pressure
- Self confidence
- Creativity
- Fit for the company
- Interest in problem solving
- Ability to navigate ambiguous situations
- Strong communication

Structure:

- Sent in advance (written case)
- On the spot (verbal case)

Recommendations:

- Practice (see CaseCoach subsection below!)
- Take it seriously
- Restate
- Ask questions
- Take your time
- Think out loud
- Determine assumptions
- Check calculations
- Consider alternatives
- Take a deep breath and relax

CaseCoach

Tippie Undergraduate Career Services offers free personalized case-interviewing prep through CaseCoach, an online tool that offers interactive coaching sessions and expert guidance. Access 27 interview videos featuring real candidates who went on to join Bain, BCG, and McKinsey and detailed commentary on their performance, as well as a library of 100+ exclusive case studies with solutions and practice drills. <https://casecoach.com/tippie/>

Case interview kit from TCS

TCS has a handy toolkit summarizing how to prepare for case interviews, with tons of recommended content for becoming a confident and well-presented interviewee. You can download this document and find more interview prep resources at <https://students.tippie.uiowa.edu/tippie-resources/career-services/undergraduate-career-services/undergraduate-career-resources/interview-prep>

Sample case question

Consulting firm websites give sample cases as well as practical advice on surviving their interview process. While CaseCoach and the Tippie case interview kit are the best places to start practicing, below is a sample case question to give an idea of what you might be asked in a case interview:

Your client is a company who makes specialist batteries for mobile homes in the United States. The battery is powerful, long-lasting, and of high quality. New industry conditions are occurring, and motor home dealers are starting to use a cheaper battery as the 'factory standard' to lower the overall price of motor homes. Your client's product is now only offered as an added feature for which the customer must pay an extra \$500 to get. How should your client go about maintaining profits given these new market conditions?

Virtual Interviews

Preparing for a Virtual Interview

- Identify and download the necessary interview platform (Zoom, WebEx, etc) ahead of time.
- Use a webcam that is easy to use and offers good picture quality. Clean the camera lens before joining the interview.
- Test your audio prior and be sure that your microphone is working.
- Ensure your background is professional and neutral. Tippie offers a selection of appropriate [virtual backgrounds](#) that you can download for personal use (reading the physical guide? Backgrounds are linked on the General Career Resources page, available on our website under Undergraduate Career Resources).
- Ensure your display and profile picture are correct, professional, and up to date.
- Be sure that the clothes you have picked fit appropriately and are clean and in good condition. This also applies to hair, makeup, and jewelry.
- Verify the time zone of the interview ahead of time to ensure your timely log-on (it is appropriate to log onto the interview platform five minutes before the official start time).
- Practice your speaking and visual presentation by recording mock interviews using a tool like Big Interview, then viewing and critiquing the recording.
- Determine key talking points or language you want to use ahead of time. You can even have a list of topics, words, data points, or cues posted near the camera for prompts.

Tips for During the Interview

- Be physically and mentally ready as soon as you enter the virtual room, even if the employer has yet to log on.
- Ask the interviewer if your volume is okay, and tell them if you cannot hear them.
- Look at the interviewer, not yourself, on your monitor.
- Have visible access to a clock (such as on your computer screen), but do not look down at your watch or phone.
- If you make a mistake or a serious gaffe, it is okay to acknowledge it or chuckle. Do not let that issue dictate your continuing performance in the interview.

Panel Remote Interviews

Group video conference calls are a challenge. It is impossible to give everyone the same amount of attention, but there are aspects you can control:

- Make the most eye contact with whoever asked the question you're answering.
- Identify the top 2–3 people on the call in terms of influence and importance. They should get most of your attention (eye contact).
- Ask prior to the call who will be included. Research these individuals if time permits and use first names when possible. If you are not sure about names, avoid using them to prevent errors.

Asynchronous Interviews (HireVue & Similar Platforms)

Asynchronous interviews, often called on-demand interviews, are recorded interviews where you respond to questions on your own time without a live interviewer present. Platforms like HireVue, Spark Hire, and Modern Hire are commonly used by employers as an early step in the hiring process, ahead of a live interview.

Why Employers Use Them

- Screen large applicant pools efficiently and evaluate communication and professionalism
- Standardize the interview experience
- Save time for both recruiters and candidates

What to Expect

Most platforms follow a similar format:

- Time to prepare: 30-60 seconds per question
- Response time: 1-3 minutes per answer
- Retakes: Sometimes allowed (1-2 attempts), sometimes not
- Recording: You'll record yourself via webcam
- Question types: Behavioral, situational, or role-specific

You may also encounter written responses, timed games or assessments, and AI-analyzed responses.

Types of Asynchronous Interview Formats

- On-demand (most common): record responses to pre-set questions
- Hybrid: recorded, live, and assessment components

Best Practices

Prepare like it's a live interview:

- Research the company and role
- Practice common questions out loud
- Use the STAR method for structure

Treat the Camera Like a Person

- Look directly into the camera (not at yourself on the screen)
- Sit upright and stay engaged
- Use a quiet space with a neutral background and good lighting (face clearly visible)
- Test your tech beforehand
- Be clear and concise; your time is limited
- Pause before answering to organize your thoughts

Common Pitfalls

- Over-rehearsed or robotic responses, or reading from notes (it shows)
- Not answering the actual question
- Poor lighting, sound, or distractions
- Ignoring time limits

Tips

- Do a practice run (many platforms offer this)
- Smile and show energy; your personality matters
- Keep a few bullet points nearby (not a script)
- Record yourself beforehand to improve delivery (using a platform like Big Interview can be helpful)

Asynchronous interviews may feel awkward at first, but they're a skill you can learn quickly. Students who practice come across more confident, communicate more clearly and stand out early in the hiring process.

Closing the Interview

“So, what questions do you have for us?”

An interviewer making this statement or something similar typically signifies that you are nearing the end of the interview. Although it's natural at this point to feel relieved, don't lose your momentum just yet! A strong closing is just as important as a good first impression and well-crafted interview stories. Before you jump from your seat and head to the door, be sure to address the following:

Questions for the Interviewer(s)

- These should be thoughtful and demonstrate your interest and fit for the organization. Review your company research worksheet and identify questions that address current issues facing the business.
- Don't over think it. If you are considering working for this organization, what is it that you would like to learn about the company and role?
- Consider your audience. If you're meeting with HR, they are not as likely to know specifics about the role for which you are interviewing, but they would be well-positioned to answer questions about corporate culture and other “big picture” company issues. If you're meeting with the hiring manager, this is your opportunity to dive deeper into the specifics of the role, the team, how they measure success, for example.
- Utilize their responses as an opportunity to reiterate your passion and fit for the business. This is your last chance to make a positive impression!
- DO NOT use this time to ask questions about benefits, salary, or other HR-related questions. At this point you are still a prospect—these questions are appropriate once you have an offer in hand.
- Demonstrate passion. Without question, ending an interview with low energy, irrelevant questions or—the worst-case scenario—responding that you “have no questions at this time” can be deal breakers.

Reiterate Your Personal Brand Statement

- It will feel natural after the Q&A portion of the interview to head for the door. Not just yet! Don't miss the opportunity to reiterate your personal brand statement (what makes you unique?), restate your passion for the role, and say why you are the right person for the job. People want to hire people they like AND people that share their passion for the company.
- Following up after the interview is also critical, so if you don't already have contact details for those you met, be sure to ask for business cards at this time.
- Don't underestimate the power of a smile. Thank the interviewer for their time, be genuine, and end with a confident handshake.
- The most impactful post-interview thank-you notes emphasize a specific talking point from the interview. Reiterate a topic from your conversation that will be a positive reminder of your time together.

Offers and Compensation

Receiving an offer is exciting—but it's also important to understand what kind of offer you're accepting. Whether it's for an internship or a full-time role, each offer may come with different terms, formats, and timelines.

In these moments, it's important to remain professional:

- Be gracious—it's okay to express excitement if you feel it.
- Say thank you and avoid making an immediate decision on the spot.
- Ask clarifying questions, such as when you can expect the written offer, and how long you'll have to review and respond.

Understanding what to expect—and how to respond—will help you feel more confident as you navigate this important step in your career journey. Here is what you want to know:

Internship offers may include:

- Start/end dates: Usually 8–12 weeks in summer; may include part-time during the school year
- Compensation: Paid (hourly, stipend) or unpaid (less common)
- Housing support: Sometimes offered, especially if relocating
- Conversion potential: Many internships are evaluated for future full-time employment

Full-Time Employment Offers (FTE)

Full-time offers are extended to graduates and signal long-term, salaried employment. These are typically more formal and comprehensive than internship offers.

FTE offers often include:

- Salary and benefits: Base pay, bonus eligibility, health insurance, retirement plans
- Start date: Usually after graduation, with flexibility
- Relocation assistance: May include moving costs or transition support
- Training or onboarding programs: Especially for early talent or new graduate roles
- Signing bonuses: Sometimes included to encourage acceptance

Offer Formats & Conditions

Here's a breakdown of different offer types and what they mean:

Offer Type	What It Means
Verbal Offer	A phone call or conversation confirming interest (not binding)
Written Offer	A formal document outlining terms, compensation, and deadlines (binding)
Conditional Offer	Offer is contingent upon a requirement (e.g., background check, GPA, graduation)
Unconditional Offer	No additional conditions, offer stands as is
Contract/Temporary Offer	Short-term role or project-based (common in tech, consulting, and gig work); with contract of terms in place

Tip: Get It in Writing

Even if you receive a verbal offer first, always ask for it in writing. This ensures you have the full details in hand including start date, pay, expectations, and deadlines to respond.

Need Help Evaluating an Offer?

Tippie Career Services is here to help. We can:

- Review internship, co-op, or job offer details with you
- Help you compare multiple offers or navigate interview and offer timelines
- Talk through negotiation options, considerations, your professional goals and priorities

The better you understand the type of offer you received and the details that surround that offer—in terms of career growth, timing, compensation—the better. You will then be prepared to consider and negotiate the terms.

Negotiation & Compensation

Negotiating your salary is a perfectly normal part of the employment process. Offers include various compensation components, such as base salary, additional compensation, total compensation, benefits, and perks. Each component should be considered and valued when you're negotiating an offer.

Base salary

Your starting salary can have a significant impact on your career earnings, because any raises you receive will be in relation to your starting salary. In most cases, your base salary is more important to negotiate than other types of compensation in terms of long-term importance and value; if in doubt, always negotiate for an increase in base salary more than anything else.

Keep in mind typical raise ranges when negotiating starting salary as well (more on this on the next page): it's usually reasonable to expect a 2-3% yearly cost-of-living raise, while merit raises may range from 3 to 5 percent, and promotions could increase your salary by as much as 10-20%. Market adjustment raises usually hover around 5%.

Additional types of compensation

Beyond base salary, there are other variations of compensation that add value and can be negotiated as part of your offer. Some examples are listed below:

- One-time signing bonus
- Relocation bonus
- Guaranteed first-year bonus
- Bonus percentage(s)
- Tuition reimbursement
- Professional dues
- Stock options—ownership

Negotiable non-compensatory offer conditions

You may also be able to negotiate non-monetary components of your offer, such as:

- Additional vacation time
- Flexible work schedule
- The ability to work from home
- Bonus structure/timeline
- Dates—acceptance or start

Employee benefits

Benefits offered to employees are an important part of the offer. Benefits may include:

- Health insurance (may include vision and dental coverage)
- 401K/Retirement accounts and company match
- Disability/Life insurance
- Tuition reimbursement and professional dues
- Transportation reimbursement or discounts
- Stock options/ownership
- Pre-tax flexible spending accounts (daycare or medical costs)
- Flexible work arrangements or remote options

Company perks

Employers may offer additional value to employees with services and discounts, often called perks. Perks may include:

- Dry cleaning service or discounts
- Wellness perks (Gym membership/on-site gym, personal coach/trainer, etc)
- On-site mail service
- Volunteer time off (paid)
- On-site childcare
- Company product discounts
- Relaxed dress code
- Complimentary food or beverages
- Professional development funding

Receiving an offer or multiple offers can be extremely exciting, but it can also be stressful. TCS career specialists are always happy to work with you as you evaluate internship and full-time offers. We can help you weigh a range of factors, determine how they align with your goals, and evaluate how they can set you up for professional success.

Negotiation Tips From TCS

It can be helpful to think of salary modifications as percentages rather than dollar amounts. If your offer is for \$32,000 yearly, a 3% increase would change it to \$33,475, a 5% increase would change it to \$34,250, and a 7% increase would change it to \$34,775. These increases may seem relatively small, but they'll add up over time, as shown in the scenario below.

Scenario:

Employees 1 and 2 both receive a starting salary offer of \$50,000. Employee 1 takes the offer as-is, while employee 2 negotiates a 10% higher starting salary of \$55,000. Assuming a 3% yearly cost-of-living increase, with no raises or promotions, the two employees' salaries will look like this over time (rounded):

After...	Employee 1 earns...	Employee 2 earns...	For a difference of...
5 years	\$58,000/year	\$64,000/year	\$6,000/year
10 years	\$67,000/year	\$74,000/year	\$7,000/year
20 years	\$90,000/year	\$100,000/year	\$10,000/year
40 years	\$154,000/year	\$169,000/year	\$15,000/year
CAREER EARNINGS	\$3.64 million	\$4 million	\$360,000

I Have a Job/Internship. Now What?

Onboarding

Closing the Loop on Your Internship or Job Search

Congratulations, you've accepted a role! Now it is time to tie up loose ends, update other company contacts, your network, and the Tippie Career Services team.

Be sure to connect with any recruiters you are currently working or engaged with—both actively as part of the hiring process or prior in terms of information gathering. Update your network via phone, email, mail (letter or thank you card), and LinkedIn.

Getting started at a new position

The following are tips on how to support your professional growth at a new job or internship.

Share a Bio—there's no better way to introduce yourself to a new team or group than by sharing a snapshot of who you are. It can speak to your educational background, internships and passion projects, volunteer, and leadership, but also your hometown and other interesting facts about you. This can be easily shared with your future supervisor, team members, or project lead.

Build a network—Take note of the names of your peers and supervisors in meetings, then, use LinkedIn to connect with them once the meeting ends.

As an intern—think about projects, technical skills, networking, or company research that can be leveraged immediately, but also in your full-time search. Don't forget to **register for BUS-3100** to get the most out of your internship and fulfill a RISE requirement. Learn more about BUS-3100 at <https://students.tippie.uiowa.edu/undergraduates/tippie-rise/internships/about-bus3100>

In a full-time role—think about goals for your first 90 days and first year.

Explore opportunities—find out what your employer offers in terms of professional groups, leadership opportunities, and development of additional skills you might need to hone.

Socialize—Invite peers to virtual and in person meet-ups, or set up group chats, hangouts, or lunch groups. These provide professional support in addition to laughs and new friends.

Update your resume—use the job description you applied to and highlight key points and responsibilities.

Update LinkedIn—Update the employment information section and post about your new role.

Completing your coursework and accepting a full-time role is an amazing milestone. Celebrate the win! The Tippie Career Services Team is proud of your dedication to learning, professional growth, and personal development. We wish you the absolute best on the next chapter. Congratulations! On Iowa! Go Hawks!

Checklist for Workplace Professionalism and Communication: Onboarding

Professional Communication Basics

- ☐ Craft professional emails (tone, clarity, and etiquette).
- ☐ Set up a professional email signature.
- ☐ Understand when and how to use “Reply All” and CC/BCC.
- ☐ Establish a voicemail greeting.

Workplace Technology

- ☐ Navigate shared drives and folders (e.g., Google Drive, OneDrive, or SharePoint).
- ☐ Use Outlook or other email/calendar systems effectively.
- ☐ Set up and use out-of-office email responses.
- ☐ Understand norms related to personal cell phone use and bringing into meetings.

Understanding Workplace Expectations

- ☐ Determine how to report changes to your schedule, calling in sick, or report an absence.
- ☐ Learn the company dress code (business professional vs. business casual).
- ☐ Understand workplace norms for greetings and introductions (in-person and virtual).
- ☐ Learn working hours—a typical work week is 40 hours, understand break times, and how to use timekeeping systems.
- ☐ Prepare for remote or hybrid work (tools, expectations, and etiquette).

Initial Supervisor Engagement

- ☐ Schedule regular check-in meetings with your supervisor (determine frequency) and create your own agenda focusing on questions, clarification, needed support or guidance, and addressing unachieved results.
- ☐ Understand project expectations and team roles.
- ☐ Ask about performance evaluation processes.

Looking for support, advice, or resources to address these topics? Reach out to the Tippie Career Services Team! You can schedule an appointment in MyUI, email us at tippie-careerservice@uiowa.edu, or find us in W160 PBB.

Checklist for Workplace Professionalism and Communication: Professionalism in Action

Communication and Collaboration

- ☐ Schedule and manage meetings using Zoom, Teams, or similar tech platforms.
- ☐ Adhere to virtual meeting best practices by ensuring your screen and video are on, use appropriate backgrounds, minimize distractions (e.g., pets), and mute when not speaking.
- ☐ Provide regular updates on tasks or projects—both in person and in writing, specifically if there are barriers to completion or success.
- ☐ Write concise and professional status reports. Use business writing principles with bullet points and specific details to clearly communicate updates.

Workplace Relationships

- ☐ Engage respectfully with coworkers in person and online.
- ☐ Navigate generational and cultural differences in communication.
- ☐ Provide and receive constructive feedback effectively.

Time and Task Management

- ☐ Manage your calendar to balance meetings, deep work, and breaks. Use to your advantage.
- ☐ Keep a to-do list and prioritize tasks and track progress and meet deadlines.
- ☐ Request resources or assistance proactively.

Technical Skills

- ☐ Familiarize yourself with common workplace tools (e.g., Excel, PowerPoint, Slack).
- ☐ Follow document formatting and sharing protocols (PDFs, version control, etc.).
- ☐ Use workplace IT systems (e.g., expense reporting, timesheets).

Navigating Work Dynamics

- ☐ Observe and approach office politics diplomatically.
- ☐ Understand how to use social media to enhance your experience vs. venting or damaging your or the employer's brand.
- ☐ Communicate with supervisors regularly ("managing up").
- ☐ Know when and how to escalate an issue appropriately.

Looking for support, advice, or resources to address these topics? Reach out to the Tippie Career Services Team! You can schedule an appointment in MyUI, email us at tippie-careerservice@uiowa.edu, or find us in W160 PBB.

Checklist for Workplace Professionalism and Communication: Offboarding

Transition Planning

- ☐ Document processes, workflows, and key contacts.
- ☐ Prepare for knowledge transfer to a successor or team. What can you offer that would be helpful to future interns, improvements, process, and suggestions?
- ☐ Return company equipment and materials.

Exit Communication

- ☐ Draft a professional resignation email. Clearly state your last day, outline any next steps, and confirm arrangements—even if the internship has a set end date or you plan to extend the opportunity.
- ☐ Schedule an exit interview and prepare constructive feedback.

Relationship Maintenance

- ☐ Express gratitude to supervisors and coworkers.
- ☐ Connect with key individuals on LinkedIn before departure.
- ☐ Request references or recommendations for future roles, if appropriate.

Personal Brand Preservation

- ☐ Update your resume and LinkedIn profile with accomplishments.
- ☐ Work with Career Services to determine how to best highlight and add your experiences to your resume and speak to it as part of future interviews.

Looking for support, advice, or resources to address these topics? Reach out to the Tippie Career Services Team! You can schedule an appointment in MyUI, email us at tippie-careerservice@uiowa.edu, or find us in W160 PBB.

Internship Housing Guide

Securing housing for a summer internship or job outside of Iowa City or your hometown can be a major challenge. In a September 2025 LinkedIn poll conducted by Tippie Undergraduate Career Services, 92% of students reported housing concerns as a barrier when applying for opportunities in other locations. This handout outlines key funding sources specific to University of Iowa, housing search strategies, and important considerations to help undergraduate students prepare for a successful experience.

Housing Options to Explore

- **University Housing** – Check to see if there is a college or university located near your potential office, some may open their housing for short term leases.
- **Short-Term Leases** – Look for 2-3 month leasing options through local property managers or rental platforms.
- **Subleasing** – Browse social media groups, rental websites, and community bulletin boards for sublease opportunities.
- **Sublease Your Iowa City Housing** – If you are paying rent in the Iowa City area, consider subleasing your housing to offset costs.
- **Shared Housing** – Connect with other interns or friends in the area to split rent and utilities.

Considerations

- **Cost Breakdown** – Account for rent, utilities, parking, renters insurance, and transportation.
- **Paycheck & Take-Home Pay** – Remember that your take-home pay after taxes will be lower than your total hourly rate or salary. Use an online paycheck calculator before committing to rent or expenses to ensure your budget is manageable. The *ADP Salary Paycheck Calculator* is used by several students and free of charge.
- **Commute** – Cheaper housing far from your office may increase travel costs or time.
- **Timing** – Begin your housing search early. In internship hubs like Chicago, New York, or Denver, affordable housing options often fill quickly.
- **Roommates & Compatibility** – If sharing housing, vet potential roommates and set clear expectations.
- **Hidden Costs** – Review all financial obligations before signing. Security deposits, utilities, and move-in fees can add up.
- **Co-Signers & Credit Checks** – Some landlords require a co-signer (often a parent or guardian) if you have limited credit history. Some properties may also run a credit/background check as part of the application process. Be prepared to provide employment information or proof of income to verify your ability to pay rent.

Cautions

- **Verify Reputable Sources** – Start with university housing offices, employer-provided resources, or established platforms (e.g., Apartments.com, Zillow, university housing groups). Avoid listings that exist only on social media without verifiable information.
- **Protect Deposits and Payments** – Never send deposits through untraceable methods such as Venmo “friends and family”, wire transfers, or gift cards. Use secure payment options with fraud

Internship Housing Guide

protection (e.g., credit card, PayPal “goods and services”), and always request a written lease or rental agreement.

- **Confirm Legitimacy of Listings** – Scammers often post non-existent properties. Verify the address using Google Maps, perform a reverse image search on listing photos, and request a virtual or in-person tour before sending money. If the landlord refuses, that’s a red flag.
- **Understand Lease Terms & Safety** – Read the lease carefully, note move-in/move-out dates, subletting rules, and cancellation policies. Research neighborhood safety using police crime maps, reviews, and public transit routes to ensure it’s practical for your daily commute.

Relocation Funding Opportunities

- **Employer Relocation Assistance** – Ask potential employers if they provide relocation stipends, intern housing, or travel reimbursement during the interview process.
- **RISE Scholarship** – Enroll in the BUS:3100 course for the duration of your internship and become eligible for a \$1,000 housing scholarship through Tippie College of Business. Scan the QR code below for more information on this funding.
- **Hawkeye Experience Grant** – Through this program, students may apply for up to \$4,000 to help defray the cost of a summer experience. Scan the QR code below to learn more.

RISE Scholarship

Hawkeye Experience Grant

Integration & Support

- **Professional Networks** – Join local young professional groups, alumni chapters, or industry associations to build connections and gain support while away from campus.
- **Social & Wellness Considerations** – Moving to a new city can be isolating. Look for intramural sports, faith groups, volunteer opportunities, or local meetups to find community.
- **Safety Awareness** – Familiarize yourself with neighborhood safety, public transportation schedules, and personal safety resources (apps such as Noonlight or Citizen)
- **Employer Provided Resources** – Some employers may offer housing stipends, relocation guides, or corporate housing partnerships. Ask your recruiter or HR contact early to avoid missing available support.

Treat housing logistics as part of your professional preparation. Planning early, asking questions, and verifying details can help ensure a safe, affordable, and positive summer experience.

Dress Codes in the Workplace

Degree of Formality	Dress Attire & Naming	Purpose	Common Features
Least Formal	Casual Relaxed everyday wear	Suitable for less people-to-people interaction; appropriate for work-from-home settings; typically NOT common in actual workplace settings	Long-sleeve shirts, sweaters, jackets, jeans, sneakers
	Smart Casual Elevated everyday wear	More put-together than casual wear but still comfortable; suitable for a more laidback workplace, most common on Fridays	Button-down shirts, blazers, chinos, dark jeans, loafers, boots
	Business Casual Relaxed business wear	Traditional business attire, but with relaxed features; sweet spot in the middle for formality; appropriate for all office environments and settings	Button-up shirts, no tie, blouses, corduroy pants, slacks, skirts, dress shoes, flats, small heels
	Business Professional Standard businesswear	Polished and professional, suitable for important meetings with stakeholders; overall clean and maintained appearance	Dress shirts, suits or jackets with ties, dress pants/skirts, dress shoes, dark colors
	Networking/Cocktail – Elevated business wear	Sometimes, less is more for a simple yet elegant look; typically NOT common for everyday wear in the office; special occasions and events	Dark-colored suits and dresses, simple accessories, tailored fits and refined fabrics
	Formal/Black tie – Sophisticated, refined formal wear	For special events that specify a formal (black-tie) dress code, such as galas, high-end fundraisers and benefits, and award ceremonies	Floor-length gowns, some shorter dresses in refined cuts/fabrics; tuxedos; dinner jackets
Most Formal			

Read more about dress codes and find helpful tips and visual guides at <https://careers.uiowa.edu/dress-success>

...and one more thing before you go!

Do you have a job offer you're excited about? Still seeking, and looking for help? Whatever your post-grad plans, let us know by taking the Iowa Graduation Survey! Eligible participants are seniors who have registered to graduate in the current semester. This data helps us guide future grads in their job search and increase the future value of your degree!
